Cars stationed in the C. L. Boss booth, which directly adjoins the niche occupied by the single Grant model. Three models of Studebaker and a like number of Chevrolet divide honors in the northeastern corner of the building and the steady flow of on-lookers in that section testified yesterday to the popularity of these cars, much to the satisfaction of W. C. Garbe, of the Oregon Motor Car Company, and J. DeVaux, of the Chevrolet headquarters.

Big Exhibits Attractive. The largest exhibitors at the Armory show are the Saxon and Paige-Detroit agencies, controlled by W. B. Deans, who has seven Saxons and Paiges on show; the section assigned to the Pacific Kieselkar branch where seven pleasure car specimens are open for inspection, the H. L. Kents Company with six varieties of Chalmers cars, the Ford and Boss organizations with six entries each, the Northwest Auto Company's display with five spaces occupied by Cole and Rio cars, and the large section reserved for the Howard Auto Company where five Buicks, including the stripped chassis expressed to Portland from San Francisco, are on display.

These seven organizations form the bulk of the show and their presentations are put out in unusually effective fashion. A group of Hawaiian ukulele artists have been engaged to dispense music while the visitors step back and forth among the Hupmobile, National and Alien cars in the Duitago-Manley Company booth. Nearby the outwary motor forms the center of attraction among the wares of Henry Ford, Detroit.

New Models Inspected. Two of the newest and the most interesting entries of the show are the Pathfinder "12" and the Hollier "8" in the Gerlinger space, and just next door on the east are the Mitchell cars with the special stripped chassis as the feature offering.

Four pleasure cars of Haynes manufacture are shown by the H. L. Mann Motor Car Company alongside the Oldsmobile Buick, formerly owned by the late E. Henry Wemme, but thus far he has been unable to make arrangements to secure the car from the Wemme estate. "Old Scout" is said to have been absolutely the first automobile to have been driven across the American continent. Early in 1905 it arrived in Portland with factory engineers in charge and it was purchased on the spot by Mr. Wemme, Oregon's first motorist.

Along the north side of the pavilion is the Winton "6-48" show car, the Pullman car entered by the Parker Motor Car Company, of Seattle, and the two six-cylinder Oakland cars and the sensational new eight of the same manufacture. Regardless of a buyer's wants in the shape of an automobile, whether he favors the four, the six, the eight or the twelve, he is bound to find the delight of his eye at the Armory this week, and whether or not he has the purchasing power to purchase, it is a fact that itches a man's soul until he buys a motorcar.

GRANTS PASS, Or., Jan. 25.—(Special.)—The body of Hayden Deas, a creek miner, who left Galice for his cabin in the mountains during the snow storm January 7, was found last night by a searching party. Deas left his pack on the trail, evidently trying to reach his cabin after becoming too exhausted to carry the pack farther. The body was found a few hundred yards farther on, and within a quarter of a mile of his cabin. Several feet of snow covered the body, so heavy was the snow that all day Monday was consumed in bringing the body six miles to McCallister's, where

KEEP URIC ACID OUT OF JOINTS

Tells Rheumatism Sufferers to Eat Less Meat and Take Salts.

Rheumatism is easier to avoid than to cure, states a well-known authority. We are advised to dress warmly; keep the feet dry; avoid exposure; eat less meat, but drink plenty of good water. Rheumatism is a direct result of eating too much meat and other rich foods that produce uric acid which is absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate the uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.
