I just want you to taste the richest baked fish you ever put into your mouth.

It is wonderful what a little Crusto will do to give it richness without in any way changing the flavor of the fish itself. It gives the "mest" of the fish a slight moisture and a richness that's almost a dressing in itself.

Try To Stuff and Bake Fish: Take either plain bread stuffing. veal stuffing of forcement, ill the fish and sew it up. Put a tescup of water in the baking pan with a demertspoonful of Crusto and bake according to the size of the fish, from Rocipe take brown.

Crusto is absolutely pure-use it for baking, frying, and as a shortener. Does all that good lard can do and does it better, costs no more. As good as and cheaper than butter for cooking.

At all Grocers - Comes in tight time (straight sided, friction top, sanitary containers that bring Crusto to you in the most perfect possible condition -deanly and convenient) - in various sizes to suit your convenience.
