Far-Reaching Benefits Are Expected From Laymen's Mission Convention.

Extensive Work Will Be Carried On in Episcopal Diocese of Oregon. Baptist Educational Confer-

Bishops, clergymen and leaders in all lines of religious work declare emphatically that they anticipate great results following the Laymen's Missinary convention that closed Wednes-day night, after a record-breaking at-

day night, after a record-breaking tendance.
Follow-up programmes are being made and the work commenced here will be carried out into the varjous smaller cities and towns of the state. Bishop Rowe will arrive on February 27 from Alaska to carry on extensive missionary work for about two weeks all over the Episcopai diocese of Orecon.

Educational Conference to Open. The Baptists will have an educational conference, opening Monday in the White Temple, Mrs. A. W. De Long will give special lectures on missions

and mission study.

Rev. Thomas Moody, of Alaska, will committee throughout the state. He will visit churches of many denomi-

We will make its effects felt. I shall start a men's club stop.

Convention Spirit Is Lauded. Dr. J. W. McDougall (superintendent Methodist Episcopal church work)— The greatest convention of a religious sort I over saw in my nine years' residence here; brought us all closer to-gether and made all churches see the good in each other. It was magnifi-

Richard Olson (Immanuel Lutheran)—It was an education, an inspiration and a help. I know men will be benefited.

EXISTENCE HELD MENTAL

Three Methods of Healing Described as Study of Principles, Practice of Tenets or Application by Someone Else.

The mental nature of matter was treated of by Professor Hermann S. Hering, member of the board of lectureship of the mother church, First Church of Christ, Scientist, Boston, Mass, in his lecture delivered last night at the Washington High School auditorium. He declared that recent discoveries have made views that mat-ter was separate from force and energy

"The unit called the atom, which was supposed to be the smallest possible division of matter substance, is now affirmed by physicists to be itself. now affirmed by physicists to be itself composed of thousands of what we call electrons," he said. "These electrons are infinitesmal particles of electrical energy, composed of positive and negative charges of electricity, which are vibrating with great velocity. It is thus disclosed that the atom is a manifestation of force. In short, matter is now regarded as the appearance or projection of force. tion of force.

"It further appears that the mental faculties which we call sight, hearing, etc., are different forms of vibration and consequently what we see, hear, feel, taste or smell is a mental impression.
