Message to the Women of Oregon. We feel there is something about butter which you ought to know. We can give you the facts, for we have been making butter for the last twenty-five years. It is quite generally recognized that nearly all disease and sickness is caused by malignant germs taken into the system. Knowing this, you are very particular about the food you prepare for your children, husband and others; you feel that when you cook the food yourself it is pure and free from injurious germs. In this you are right, for you would not think of serving raw pork, bacon or other foods without first destroying all germ life with heat, through the process of cooking. You use butter every day and you know that it cannot be cooked without spoiling. But the creamery can cook the "raw" CREAM from which butter is made. We have been doing it for years. Butter made from cooked and chilled cream is called "Pasteurized Butter." To be safe you must use Butter showing the words "Pasteurized Butter" on the carton. We would like to have you try our new brand, "Maid o' Clover." Every ounce of cream used for this butter is PASTEURIZED. Yours truly, Mutual Creamery Co. East Tenth and Burnside Sts. PORTLAND, OR.
