The figures on farm reserves are not leaved upon as in any way bearish. It will be five menths before new wheat in quantity is available, which will allow ample time for the marketing of the surplus. Some grain will be carried over, regardless of market conditions, and more will be required for Spring seeding than probably in any farmer year. Even with a lighter movement eastward than in recent months, the stocke on hand in the latter part of the season, in the opinion of graindealers, will not be bur-

eastward than in recent months, the stocks on hand in the latter part of the season, in the opinion of graindealers, will not be burdensome.

The country markets were again inactive persectary. There was a moderate demand and a few bids were put out, but there were no offerings by farmers. At the local exchange, wheat bids were reduced I to 3 cents.

There is no change in the fleur situation. The domestic market is quiet, but with wheat farmers holding firm, miliers are not disposed to reduce flour quotations. There is a little export inquiry from the Orient, but freights are so accessively high that the Orientals cannot do business. There is no West Const trade owing to the lack of formage. A little flour has been sent across the continual in parcels for European shipments.

Bridstreets' reports wheat clearances this week at 0,000,000 bushels and corn at 379,000 bushels.

Also this letter says that "the supply wool is undoubtedly falling below the

world's present immediate needs and we see no way in which this seeming requirement can be quickly supplied." In view of the circumstances, it is no wonder that reports from Montana state that woolgrowers look for the best scane on record. One of the largest growers of that state reports that recently some of last year's wool was sold mt 33 cents and that record prices already are being offered for the Dig clip. Most of the wool secured to date is in Utah and the Triangle section. Yet the contracting movement has spread to Idaho, Oregon and Washington.

Stocks Firm at London.

LONDON, March 10 — Mexican news appeared to have little effect in the American section of the stock market, where the tendency was firmer. Movement From Argentina Is Not Up to Expectations-Crop Reports From Winter Grain NEW YORK, March 10.—Spot cotton— Steady; middling uplands, 11.90c; sales 300 bales. States Are Bullish.

CHICAGO, March 10.—Scantiness of shipments to Europe from the Southern Hernisphere tended today to strangthen the wheat
market here. Largely in consequence, values
closed firm at 19% to 5c net advance,
with May 1111% and July \$110%. Other
leading steples snowed gains—corn 5; to 1c;
outs 5s 5; to 5c and provisions 10 to 27c.
Higher quotations from Liverpool gave
the first upward impetus to the price of
wheat in Colcago. The chief reason assigned
for the British advance want that the forwarding of supplies from Argentina had
proved disappointingly small. Another element which influenced a temporary reaction from the early strength was a supplemental Washington report that showed as
much as 151,000,00e bushels yet on hand
in country mills and elewstors. Buillish
crop reports from the nild Winter states
also counted taward evoking firmness in
the inst part of the session.

Corn received good support, ewing to the
main to sensational advances in the price
of hogs. Besides, receipts were light and
prospects were for a continued decrease in
arrivals.

Onts paralleled the action of corn. East-Duluth Linseed Market.
