TENT TOWN SCORED

Heights Terrace Residents Appeal to Council.

REMOVAL IS REQUESTED

Property-Owners Declare Presence of Unightly Tenthouses is Nuisance—Building Restrictions Violated.

Installation of tents and tent houses in a district where people have built attractive homes and endeavored to make their neighborhood inviting for residence purposes is being assailed by residents of the Heights Terrace dis-

trict. They are waging a fight now against a tent colony built up in their district by Mrs. C. A. Wells.

It is declared by residents of the section that when they erected their homes, or most of them at least, their property was restricted to modern structures. They say they were not permitted to erect double houses, flats or apartment houses because the tract was reserved for a high-class residence section.

City Attorney Investigates. It is said that the restrictions seem to have been lost sight of and after the neighborhood has been built up unsightly tent colonies are permitted to spring up.

The fight against the tents has been carried up to the City Council, but as yet the Council has done nothing. The question has been referred to City Attorney LaFoghe to try to work out some solution. He is looking into the question of some of the tents occupying street space and also some other buildings being on the street area.

The residents of the section say that Mrs. Wells has erected the tents for commercial purposes. She is not in need, financially, it is said, being the owner of considerable other property in the city. They say the tents are unsightly in the neighborhood, and have greatly reduced the value of property and the desirability of the district for residence purposes. Attractive homes face the tent colony on every side.

Protection Is Sought. The Heights Terrace people say they are campaigning not only for the benefit of their own community, but also for the general good of the city. They contend that it is an exceedingly bad thing for the city if unsightly things are to be permitted in residence sections after people have built attractive homes and improved their property.

It is a detriment that the city will feel these people say, and one which will keep many people from erecting homes. They want the City Council to prescribe a limit for the protection of the districts established for attractive homes.

BAKER, Or., June 12.—(Special.)—Growing hope of ranchers that the cold and rain had killed the grasshoppers in that vicinity has been blasted by the Spring sun, which has hatched out thousands of the pests in the sandhills in the Beech Creek district.

The number is so large that ranchers expect a plague and are preparing a campaign against them to keep crops from being attacked, but it is believed the loss will be immense.

The appearance of the army of grain-eaters in the sandhills is considered an indication that all of Grant County will be invaded this season.
