GRIP AND NEURASTHENIA

There is a form of neurasthenia that follows the grip. Doctors call it "post-grippal" neurasthenia. One of the foremost medical authorities of New York city in a lecture in the international clinics, said:

"Broadly speaking, every victim of the grip will suffer from post-grippal neurasthenia also. Lowering of nervous tone with increased irritability is the most striking effect of the disease, languor of mind and body, disturbed, fitful sleep and vague pains in the head and elsewhere. The treatment calls for rest and a tonic."

Dr. Williams' Pink Pills, a non-alcoholic tonic, are particularly suited for building up the blood and strengthening the nerves after an attack of the grip. The rich, red blood expels the lingering germs from the system and transforms despondent grip victims into cheerful, healthy, happy men and women.

If you have had the grip get a box of Dr. Williams' Pink Pills now from the nearest drug store and begin the treatment at once.

On request we will send you a free pamphlet, "Building Up the Blood," which contains a chapter on the grip. Address The Dr. Williams Medicine Co., Schenectady, N. Y.
