MULTNOMAH SMALL FISH THRIVE.

MULTNOMAH SMALL FISH THRIVE. Multnomah Creek, which supplies the water that pours over Multnomah Falls on the Columbia Highway, was stocked with 6000 fingerling trout last month and they appear to be thriving. The fish may be seen in the deep clear pools along the stream for several miles toward the interior. Most of the trout were placed in the stream above the falls so they can follow up the streams connecting with Multnomah. Back of Multnomah Falls are two other falls over which the fish could not climb, but several thousands were placed above them. If allowed to multiply it is thought Multnomah, Big Johns and other tributaries to Multnomah Creek will become stocked with trout in the course of time, adding to the attraction of the Larch Mountain trail.

In the past six months we have had but 35 arrests for drunkenness. "Before the prohibition law we imported 54,000 quarts of liquor in a year and had breweries. Now we have no breweries and we have only imported 955 quarts since January 1."
