RUSSIANS PRESS ONWARD IN DRIVE

Attack After Attack Hurled at Slowly Marching Lines of Teuton Forces.

250-MILE FRONT ASSAILED

From Baltic to Carpathians Teuton Line Holds Save in One Place in Western Galicia-Report of Victory Is Expected.

BY ARTHUR S. DRAPER. Correspondent of the New York Tribune, By special Cable.)

LONDON, Sept. 10 .- (Special.)-From the Baitic to the wooded heights of the Carpathians, the Russian armies are on the offensive. Attack after at-

It is too early to expect announcements of successes from Petrograd, which invariably delays such reports until victory is assured and the objectives

The fact that the Russian aircraft have been unusually active in the last few days points to a concerted plan by the Car's commanders to hammer at the vital points in the enemy's lines until they crumple. The aeroplanes have been used for scouting purposes and undoubtedly have brought in in-formation that has led to the general

Sunday's War Moves.

CONTINUING their advance in West-

ground to the Russians in the Car-pathians near Zabie, to the west of Shypot. The Russians, says Berlin, are on the offensive from the Baltic to the wooded heights of the Car-pathians, but everywhere except near Shypot their attacks have been re-pulsed.

Attempts by the Russians to break through the Austrian lines southeast of Lemberg, near Hallez, failed, according to Vienna, with heavy losses. The Vienna statement mentions the gallan-try of the Turkish forces fighting with the Austrians in this region.

The repulse of German counter-attacks and continued heavy bombardments formed the chief features of the fighting Sunday on the Western front in the Somme region between the French and British forces and the Germans. The attacks by the Germans against the British took place north of Ginchy and against the French south of Berny-En-Santerre.

A recapitulation by the British War Office of the results attained by the British on the Somme front during the

British on the Somme front during the last week shows an advance on a front of \$000 yards to a depth varying from 300 to 3000 yards.

In addition to numerous air battles In addition to numerous air battles between French and German aviators, in which seven German machines were forced down. French aircraft have heavily bombed German depots and establishments in the regions of Chauny, south of St. Quentin, Ham and Peronne. London claims for British airmen the destruction of three German machines and the driving down of others in a damaged condition.

The usual artillery activity contin-ues in the Austro-Italian theater. tack is being hurled at the slowly weakening Teuton lines in an effort to break through to a decisive victory before Winter sets in.

Detains of this great general offensive by the Czar's forces are lacking tonight, aithough Berlin and Vienna corroborate early reports of heavy fighting along the whole 250-mile sons we ought to be the first to start line. Except in Southern and Western sons we ought to be the first to a peace overtures. I do not think so line. Except in Southern and Western Galicia, in the shadow of the mountain wall, the Russians apparently have been unable so far to break the enemy's lines, but observers here point out that pretty well so far, and will do it longer long enough to make the others tired

MORE THAN 21,000 CAPTURED AT TURTUKAL.

Number of Dend and Wounded Enormous, and Many Cannon and Much Ammunition Taken, Too

equal distance south of the Constanzaequal distance south of the Constanzaeq cqual distance south of the Constanza-Bucharest Railway line. The capture of the fortress is announced by the Berlin War Office, which adds that the Roumanians and Russians fighting in Dobrudja apparently have suffered con-siderable losses during the last few days.

The Thirty-fourth, Thirty-fifth, Thirty-f siderable losses during the last few days.

In Banal, north of Orsova, however, the Roumanians are keeping up their advance against the Austrians, having compelled the Austrian right wins, after it had pushed them back two and a half miles, to withdraw to its former position under a strong counter attack. Attempts by the Roumanians to advance against heights west of Csik Szereda were repulsed. In Southern Bukowina, near the junction of the Hungarian and Roumanian borders, the Germans are in contact with the Roumanians.

Berlin and Vienna concede a gain of The British artillery, so far as the fortress and plentiful supplies of ammunition, rifles, machine guns, etc.

"The number of prisoners and the amount of booty taken has not yet been ascertained. Up to the present time we have counted 400 officers, not only have helped the artillery instances aviators have been traublesome. They are reported to have even dier-Generals; 21,000 unwounded soldiers, two flags and more than 100 diers, two flags and more than 100 modern cannon, among which were two batteries stolen during the second Balkan war in 1913, when Roumania compelled Bulgaria to cede Dobrudja, in which Turtukai is situated.

"The Roumanian is seen informed by German officers, has been informed by German officers, amount of booty taken has not yet amount of of the present taken has he in am

FRENCH ARE RATED BEST

Teutons Pay Tribute to Artillery Fire of Britons but Say Gauls Are Better Officered and Better Trained Than Allies.

WITH THE GERMAN ARMY ON THE BAUPAUME FRONT IN FRANCE, Sept. 7, via Berlin to London, Sept. 10.

The German officers with whom the Associated Press correspondent conversed during the present three days visit to this front admit freely that the Anglo-French armies have gained successes in their Somme offensive and that it is not impossible that they will crush back the German front a few more miles in spots by a continuation of the stupendous hammering with artillery and human flesh. But they declare that these successes are without effect on the ultimate result of the war. On the other hand, they express them-WITH THE GERMAN ARMY ON On the other hand, they express them On the other hand, they express themselves as convinced that the German army is enormously superior to the hastily raised British levies. The French army they consider well officered and well trained.

Artillery Preparation Stupendous The artillery preparation for the reat allied attack Sunday and Monday s described as the most stupendous of the campaign. On the huls for four or five miles behind the front it was necessary to shout at the top of the

Of the detailed movements on the offensive it is difficult to form an esti-mate, but the view is held here that the French have attacked with greater suc-cess than the British. At present there is a period of comparative calm, but staff officers are convinced that a new and vigorous attack certainly will come. "But they will never breach the German lines," is the remark on all

correspondent has observed, and as he the inter-island steamer Cebu reports has been informed by German officers, that a British destroyer held up his is shooting very well. The British ship at 2:30 o'clock Monday morning is shooting very well. The British ship at 2:30 o'clock Monday morning aviators have been troublesome. They under the guns of Corregidor fort and not only have helped the artillery immensely in observation, but have even patrol in adjacent waters, the captain

BANKERS, FOUND FRIENDLY

Federal Farm Board Members Surprised by Attitude.

SAN FRANCISCO, Sept. 10. - That bankers have shown a friendly attitude toward the Federal farm loan enterprise was the declaration made by Herbert Quick, one of three members of the Federal Farm Loan Board, who arrived here today.

Mr. Quick was accompanied by George W. Norris and W. S. A. Smith, members of the board, which is making a trip of investigation prior to the establishment of Federal farm loan

"Our trip has demonstrated," said Mr. Quick, "that the farmers are ready and anxious to take advantage of the provisions of the rural credit act. The friendly attitude of the bankers has surprised us. Apparently they have taken the position that the money lost in farm mortgages will be more than made up in greater business resulting from placing farmers on a credit plane with merchants and other business

GERMAN LOSSES MOUNT

240,900, Say British.

LONDON, Sept. 11 .- German casualties in the war during August, according to a compilation here from the German casualty lists, totalled 240,909. This brings the German totals since the beginning of the war, as compiled from the same sources, to 3,375,000. These figures include all the German nationalities, but do not include the naval and lonial casualties.
The detailed figures for the month

August follow: Killed, 42,700; prisoners, 1800; miss-ng, 42,900; wounded, 153,500; total,

ROOM MOSES USED

Ruins of Palace of Menesthah, Pharaoh of Egypt, Are Found by Scientists.

CARVINGS ARE BEAUTIFUL

Throne Room Where Moses and Aaron Often Appeared Much Larger Than First Suspected. Bible Students Interested.

PHILADELPHIA, Sept. 10.—(Special.)—The University of Philadelphia Museum has just received a letter from Dr. Clarence S. Fisher, head of the Eckley Coxe expedition to Egypt, announcing that he has completed his work of excavating the ruins of the palace of Menepthah.

Since his last letter he has made the important discovery that the palace which he had partially uncovered is almost exactly twice the size that he had supposed. This makes it among the greatest palaces of ancient Egypt.

The portion originally excavated seemed to be complete in itself, as it contained the throne-room, where Moses and Aaron appeared from time to time before Pharons and demanded

to time before Pharoah and demanded the release of the Israelites. Surrounding the throne-room are many chambers for various purposes. and the front contained a notable vestibule with rows of enormous pillar beautifully carved and collected. Bu it now appears that back of this series of rooms was a portion of the palace about 140 feet long containing many rooms and apparently some rich collo-

rooms and apparently some rich collomades were in existence at the time of
the destruction of the building.

The discovery of this palace has
awakened interest of scholars all over
the world. Many of them have written to the museum for further particulars. Dr. A. H. Sayse, of Oxford, the
most distinguished orientalist in the
world who has lived long in Egypt, is
greatly interested in this discovery,
which he considers important.

The university museum is considered fortunate in conducting the only
excavations now in progress in Egypt.
Naturally great popular interest has
been aroused over the discovery of
this palace because of its connection

PRISONERS BLIND KEEPER

Men Held in New York for Minor Offenses Make Break.

NEW YORK, Sept. 10.—Four prisoners charged with minor offenses escaped from the detention pen of the West Side prison here tonight after throwing red pepper in the eyes of William J. Jackson, the head keeper, rendering him unconscious by striking him on the head with a pitcher and taking his his toys. partment now is prepared to train the undreds of National Guardsmen who seek to become military aviators, the Aero Club of America announced here conight, when it had been officially informed by Washington.

With a pitcher, and taking his keys. He with a pitcher, and taking his keys. He will be promained to physicians, may be permanently blinded. The other 16 inmates made no attempt to follow the jalibreakers. One of them went to the

POUCIES AUTHORITION OF THE PROPERTY OF THE PRO

Keeping up with the procession is not enough for the General—he must lead. And lead he does—in volume, in quality and in price.

The General's leadership is due to the enormous resources at his command—the five m's of modern manufacturing—men, money, mills, machinery, materials.

Men who have learned the roofing business through years of practical experience are in charge of every department of the business. Men who have made a life study of the blending of asphalts comprise the General's Board of Expert Chemists.

Money—the means to promote efficiency, increase out-put, reduce cost, prevent waste is at the General's call in abundance.

Mills the largest roofing mills in the world are the General's. They are advantageously located at points where cost of fuel, access to raw materials and quick distribution of finished products are most favorable.

Machinery—the most modern known to the roofing business, equips each of the General's enormous mills. Not a dollar is left unspent which would speed up production, increase quality or lower costs.

Materials-the food of the mills-is bought by the General in enormous quantities and stored. This means the pick of the market and favorable buying, and no loss from idle machinery, due to shortage of materials.

Thus the success of CERTAIN-TEED Roofing is no secret, but is due to a combination of resources and experience without parallel in the roofing business.

CERTAIN-TEED is made of the best quality roofing felt, thoroughly saturated with a scientific blend of soft asphalts, the formula of the General's board of expert

ed 1916 General Roofing Manufacturing Co.

chemists. It is then coated with a blend of harder asphalts, which keeps the inner saturation soft and prevents the drying-out, so destructive to ordinary roofing.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it lasts longer.

CERTAIN-TEED is made in rolls; also in slatesurfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roof, from sky-scraper to small residence or out-building.

CERTAIN-TEED is sold by responsible dealers all over the world, at reasonable prices. Investigate it before you decide on any type of roof.
