

ONLY 90 PROTEST TAX ASSESSMENTS

System of Appreciation of Values Credited With Cutting Number Down.

BOARD SITS 3 MORE DAYS

Early-Day Complainant Who Came to "Lick" Assessor and His Entire Force, Is Replaced by More Amiable Protestants.

Only 90 protests against assessments made on property were filed with the County Board of Equalization, which has been in session four days. Records of the office show that the number is the fewest made in the past 12 years.

There are now but three more days of the session and it is predicted that the total number of protests this year will be less than 200.

Last year the number of protests was 438, and five years ago 900. Assessments are made in the county on approximately 200,000 pieces of property.

The small number of protests this year is thought by county officials to be due largely to the system of appreciation of values which has been adopted by County Assessor Reed. Under the present plan the rapidity of depreciation of different styles of buildings is figured and each year this depreciation is taken into consideration in making the assessment.

No Protest Is Sentencing. Not one communication of a scathing or sarcastic character has been received from a property owner who feels aggrieved this year, and the lack of such communication is commented on by the deputies in the office.

In the past few years, according to the stories told, many a husky farmer and property owner came to the office ready to "lick" the Assessor and his entire force. Deputies in the Assessor's office also declare they miss many familiar faces of taxpayers who used to make an annual event of their calling upon the Assessor and kicking about the taxes.

About 50 per cent of the protests received so far involve assessments made on automobiles. As a usual thing the protests are made because the owner says he has sold his machine or has moved to another county or state.

C. S. Hobbie, 84 1/2 Thirty-ninth street, sent in a protest yesterday against the valuation of \$90 which had been placed on his car. He declared that the machine was out of order and that it was too much expense to fix it up and that it was practically valueless to him.

William Gadaby Protests. William Gadaby registered a protest yesterday against his property at First and Washington streets being assessed at \$63,000. He declared he would sell the property for \$1000 less than that figure. The land was assessed at \$56,000 and the building, which is a store, at \$7000.

Mr. Gadaby admitted that his protest was not based on the inequality of the assessment compared with other property in the vicinity.

Joe Shemanski, owner of property at 409 1/2 Morrison street, asked a reduction of \$2200 on the valuation placed on his building there. He offered no objection to the assessment of \$23,000 for the land. The building was assessed at \$10,200. He declares that the buildings cost about \$17,000 at the time they were erected in 1904, but that the valuation has depreciated.

Mrs. Sadie Shemanski also registered a protest against the assessed valuation of \$6000 made on property at Irving street. She said that similar property adjoining had been purchased recently for \$4000.

The session of the Equalization Board will close Monday.

GOOD THINGS IN THE MARKET

THE new arrivals this week are all reminders of the ingathering of the fruits, and the end of the season. Pomegranates, 10 cents each or three for a quarter. Persimmons, 50 cents a dozen; Cape Cod cranberries, 15 cents a pound. Crawford peaches, 85, 55 and 50 cents a box. Elberta, freestone, 10 and 15 cents a dozen. Himalayan blackberries, two boxes, 15 cents; \$1.40 a crate. Raspberries, 10 cents a box—getting scarce. Huckleberries, 20 and 12 1/2 cents a pound. Strawberries, 10 cents a box. Hungarian and egg plums, 30 cents a basket. Bananas, 15 to 20 cents a dozen. English Damson plums, local, 6 cents a pound. Flaming Tokay and Malaga grapes, 50 cents a basket, 5 cents a pound. Petite prunes, 25 cents a basket, 20 cents a pound. Italian prunes, 40 cents a box, three pounds 1 cent. Large fancy Bartlett pears, \$1.50 a box; 30 cents a dozen, other stock 10 cents a basket. Nutmeg melons, 15 cents each; cavaas, 10, 20, 25 cents each, 2 cents a pound. Cantaloupes, 85 cents a box, three for a quarter. Small melons, four for a nickel; larger, five and three for 10 cents. These can be located in the Carroll market. Watermelons, 1, 1 1/4 and 3 cents a pound. Hyslop crabapples, 4 cents a pound. Siberian, \$1 a box, 5 cents a pound. Sickle pears, for preserving, from Grants Pass, three pounds for a quarter. Fresh pineapple, 10 cents a pound; new coconuts, 10 cents each. Valencia oranges, 40 cents a dozen. Lemons, 20 to 40 cents a dozen. California apricots, 5 and 10 cents a dozen. Green and black figs, 20 to 30 cents a dozen. Ground cherries, 30 and 12 1/2 cents a pound. Gravenstein apples, \$1.50, \$2 and \$2.25 a box.

In the vegetable market the newest comer is spinach, Lima beans, from San Diego, Cal. (long green pods), 20 cents a pound. Green corn—Evergreen, Yucatan and Golden Bantam, 25, 15 and 10 cents a dozen. Sweet potatoes, 5 cents a pound, seven pounds, 25 cents; Burbank, 18 pounds for a quarter; \$1.25 a hundred pounds. Young, tender spinach and green bell peppers, 10 cents a pound. Field-grown tomatoes, 75 cents a box. Kohlrabi, 10 cents a bunch; Summer squash, three for a quarter. Swiss chard, three bunches, 10 cents. This variety of greens deserves to be

DISEASE IS TRACED TO THE STATE

Christian Science Adapted to Needs of People Is Cure, Says Lecturer.

WORLD'S THOUGHT REVISED

Healing Is Effected by Knowledge That Sickness Is Unnatural and Need Not Be Endured, Says George Shaw Cook, C. S. B.

The teaching of Christian Science concerning the cause and cure of disease has to a great extent revised the world's thought on this subject, said George Shaw Cook, lecturer of the board of lecturership of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass., who addressed a large audience in the First Church of this city, Nineteenth and Everett streets.

In introducing the lecturer, Joseph W. Reynolds, first reader of First Church of Christ, Scientist, said: "History informs us of a man who destroyed every phase of disease and evil, who broke every band of limitation with spiritual power. This power used by Jesus has been benefited and made available in our time by a woman, and in presenting her discovery to mankind, Mrs. Eddy named it Christian Science."

Law's Still Available. "To many it has seemed strange that spiritual laws could be understood and practically applied for the healing of disease as well as the laws of nature are available and true Christian Science is proving it in the same manner as did the master."

Mr. Cook spoke particularly of the healing of the sick and redemption from sin and the adaptation of Christian Science to the needs of the people. "Many observing physicians are willing to admit much in the direction of the mental cause of disease; more, indeed, than laymen who have less opportunity for observation. Christian Science goes beyond the most progressive physicians and declares that all disease is of mental origin. In so doing it does not deny the existence of germs of disease but declares that the germ of disease is due to conscious fear or willful wrong-doing on the part of those who seem to be the victims of disease. It merely claims that somewhere back of all so-called abnormal or diseased physical conditions there are erroneous conditions of thought."

Science Adapted to Needs. "Without adaptation to the needs of mankind the Christian Science Church as an institution would have no good reason for existence. In order to justify its presence among men, the Church of Christ, Scientist, must be ready to answer, not theoretically but practically, the question, 'What is Christian Science able to do for suffering humanity?'"

Better to appreciate the answer which Christian Science makes to the foregoing question, it is well first to gain some understanding of what the teaching of Christian Science stands for and to know that first and last it stands for the fundamental fact that God is good, that he governs by mind, divine principle, life, truth, love.

It also stands for a perfect spiritual universe as the creation of God, and for a perfect spiritual life, the image of God. It stands for the universal fatherhood and motherhood of God, and for the complete and perfect brotherhood of man.

Law of God Observed. "Christian Science stands for the law of God and the government of God and for the absolute supremacy of God's law and government. It stands for the preservation and protection and direction of man and the universe in accordance with the law of God. It stands for freedom from fear, for salvation from sin and consequent suffering for mankind's deliverance from disease and death. It stands for mental integrity and moral purity; for fidelity and faithfulness; for right relationship, unity of purpose, brotherly love, true charity and real compassion. It stands for the conscious harmony which is heaven within and for all that makes for the establishment of the kingdom of heaven, or harmony, among men."

Having told something of that for which Christian Science stands and having indicated to some extent that which it claims to do for those who are in trouble, may it not be pertinent to say something about what Christian Science is doing to fulfill its promises and something of the way in which it is being done?

Through the ministry of Christian Science many thousands have been healed of disease and redeemed from sin and some have been turned back from the very gates of death. Among these thousands there are those who have been raised from beds of un-speakable pain, those who have been cured of chronic diseases, those who have recovered from their sickness under other forms of treatment without any treatment. It is probable that some of them would have been healed by other means and that some would have become prosperous in another way, but it is a fact that the great majority were utterly hopeless and apparently helpless in their misery until Christian Science showed them a way out of it.

How were these people healed of diseases which in many instances had baffled the most skillful physicians? They were healed by Christ, truth, which takes away the sins and heals the sickness of the world.

Christian Scientists believe that they have demonstrated by results already attained that Mrs. Eddy has surely discovered and correctly set forth the principle and law of God, which Jesus revealed all manner of disease among the people of his time. Jesus said of his work, 'I can of mine own self do nothing. The Father which dwelleth in me, he doeth the work.'

Father Is Divine Mind. "The Father referred to by Jesus as being the principle of his works was, according to Christian Science, the divine mind."

Mrs. Eddy has said of her discovery and of its reception, 'I have never supposed the world would immediately witness the full fruition of Christian Science, or that sin, disease and death would not be believed for an indefinite time, but this I do aver, that as a result of teaching Christian Science, ethics and temperance have received an impulse which has benefited humanity longevitously increased. If such are the present fruits, what will the harvest be, when this science is more generally understood?'"

The lecture will be repeated tonight.

A Washington, D. C., reformer and hostess of the world to a killing of 500 persons who will not wear leather shoes, nor will she have any fish upon her table. Her gloves are always of silk, and she wears rubber soles exclusively. Fur and feathers are also taboo.
