

TALLY IS ACCURATE BY THE OREGONIAN

Difference in Way of Estimating Plurality Adds to Hughes Lead in County.

PAPER ONLY 2 VOTES OFF

Five Republican Electors Average 41,400 Ballots Each and Democrats 35,689, Giving Leader Margin of 5711.

Gain for Charles Evans Hughes of 119 votes over the unofficial newspaper plurality is shown in the official canvass of the vote for presidential electors in Multnomah County, completed yesterday by County Clerk Coffey's deputies.

The newspaper count is taken off the official board statements, while the official count is made from the tally sheets. For this reason it is seldom that the two figures are the same.

The popular vote for Hughes' electors totaled 207,002, and that for Wilson's electors 174,444, a total plural lead of 28,558 for Hughes, which, divided by five, gives the average popular plurality of 5711.

Closest Vote 5549. There is a difference between the popular plurality and the actual plurality, interpreting "actual plurality" as the number of votes needed by the highest Wilson elector to defeat the lowest Hughes elector.

The Oregonian's unofficial figures gave the Socialist candidate, President 1827 votes, 60 more than the official popular vote, which was 1827, and the Prohibitionist candidate 1070 votes, when the popular vote is shown to be 1073 votes, Emmett Callahan, sole Progressive elector, received 87 votes.

Table with 2 columns: Name and Votes. Includes Charles Evans Hughes (41,435), J. F. Wilson (35,689), and others.
