EDAHO STOCK IS BEING FED

Hay Prices in Caldwell Section Are Now
Advancing.

Reporting on market conditions, the Caldwell, Idaho, Commercial Bank says in its monthly news letter:

"There remains but little unsold hay and some of our customers report receiving \$10 per ton in the stack for recent sales. It is likely that the bulk of the hay in this vicinity will be feld out during the Winter, and those who are sold too short to carry them through for the Spring work will find that high prices will have to be paid for what must be purchased.

"Prices on wheat have been unsettled, but appear to be strengthening some at this time. Today's quotations are, wheat \$2.10 per cwt.; barley, \$1.80 per cwt.; oats, \$1.70 per cwt.

Local merchants report paying \$2.25 to \$2.50 per cwt. for potatoes and state that the offerings are not very plentiful. A few

record prices were paid for this vicinity and the demand was greater than the supply. It is expected that many thoroughbred cattle will be shipped in during the coming year, as there is a very general demand for a better grade of cattle, also many are contemplating increasing their holdings on the farm.

"Hog prices have held strong, but only one-half as many cars were shipped out as last year during the same period. High-priced feed caused many to dispose of their stock hogs, while others have preferred to delay placing their hogs in the fattening pen until later, expecting to secure better prices. Dealers today are paying \$5.50 owt. f. o. b. here."

Sharp Advance in Prices-Tem-

CHICAGO, Jan. 3 .- Urgent demand from seaboard exporters resulted in a broad de-mand for future deliveries of wheat and caused a steep advance in prices today. After souring 6% cents the market closed strong at \$1.56 to \$1.85% for May and \$1.52% to \$1.52% for July, with the market as a whole 5%c to 6%c above yesterday's finish. Other leading staples, too, all scored substantial net gains: corn 44 @Nc. oats 2% @Nt., and provisions 2% @22c.

2% 03%; and provisions 2% 02%.

Record-breaking high premiums were paid by exporters to obtain wheat available for immediate shipment. The total amount thus purchased was estimated at 800,000 bushels. Activity on the part of submarines gave the wheat market at one stage another sharp setback, but the effect on prices soon wore off.

Corn was buildship influenced not only by the strength of wheat, but likewise by active purchasing on the part of houses with seaboard connections.

In cats, as in other grain, the leading future was free buying for the seaboard. May delivery was in most request.

Provisions railled when the cereal markets buised. A decline in the hog market had a depressing effect.

Leading futures ranged as follows:
