lieve they have found the solution to the feed shortage problem. Rye produces two tons to the acre, according to their average yield, and stock fed on it are reported to be doing well. The fact that it is possible, by cutting early, to get two crops, has made the farmers and stockmen hopeful that the annual hay shortage will be minimised. The feed shortage in the Riverview district is reported to be acute.

Bumors on Revolution in Germany Add to Upward Movement.

NEW YORK, March 21.—The market for coffee intures was firmer today on renewed buying of the later deliveries, believed to be based on the hope of peace before the end of the year, and covering of the near positions. The market opened at an advance of 8 to 8 points, with May seiling up to 7.80c and September to 8.10c during the afternoon, or new high ground for the movement. Rumors of a revolution in Germany probably contributed to the late advance, and the market closed at the best point of the day, or 17 to 19 points net higher. Sales were estimated 62,250 bags.
