Mr. LaRoche Says if Bill Initiated by Jitneys Should Pass General Regulation of Trade Arteries Would Be Denied Council.

The most unusual and unprecedented conditions would be brought about in Portland by the adoption at the city election June 4 of the litney free streets measure, according to City Attorney LaRoche. He says the measure would take out of the hands of the city the entire question of control of use of the public streets for commercial purposes, a condition which does not exist in any city in the United States and a condition that would be serious.

"The strange part of it is," said Mr. LaRoche yesterday, "that there seems to be no concerted movement against it, yet it is one of the most important measures on the ballot. It is time the public was inyestigating.
"It is my opinion that it would open the streets to absolutely unrestricted use for commercial purposes excepting to such institutions or individuals as construct permanent structures in the streets. It is my opinion that it would The most unusual and unprecedented

They are subject to Councilmanic control at present. This measure would put them beyond control of the lawmaking bodies.

It strikes me it is time for the

The measure has been referred to the voters by the Jitney Drivers' Union, which organization is striving to wipe out all forms of regulation against fitness without removing any of the regularion. neys without removing any of the reg-ulations and restrictions against the street railway company. The measure was submitted by initiative petitions.

Executive Asserts Protests of Opponents Are Weak and His Opinton Is Unchanged.

"The only man who is justified in replying is he who is hit and wishes to defend his action." This was, in part, Mayor Albee's rejoinder yesterday to the complaints of various Front-street merchants, who objected to the Mayor's statements recently regarding the storing of potatoes in warehouses when they are badly needed for seed.

"I repeat," said the Mayor in a statement yesterday, "that the man who holds potatoes in large quantities in the face of the present need of seed for the purpose of a few added dollars is deficient in true patriotism.

"For the benefit of those who are so wherearthy definitions there have been seed to the seed to t so vehemently defending themselves against charges never made, I refer to my original statement. Front-street merchants, commission men or any other groups of men were not men-tioned. My statement was plain—that I had information that on March 1, 1917, there were more than \$0,000 sacks of potatoes in storage. For the bene-
