Bookkeeper or Managing Accountant—Which?

WHICH is worth more in your Accounting Department-

The man whose idea of the job is "Counting figures all day long"-or the man capable of planning and organizing the work and directing its execution so as to produce the best results at the least cost?

It is to the latter-the thinking, Managing Accountant-that the service of the Comptometer appeals with greatest force.

The minute such a man sees an operator Proving Postings, Balancing Accounts, Footing Trial Balance on the Comptometer, he cannot help being impressed: first, by the rapid dispatch of the work; and second, by the extreme accuracy of it.

And his interest is intensified when he learns

that the same machine applied to the extensions

of Billing and Inventory, the figuring of Costs, Estimates, Prorate Percentages, will easily handle the work of two or three mental figure clerks.

It is easy to investigate the merits of the Comptometer. You run no risk of disappointment - take no chances - incur no obligation. Simply invite a Comptometer man from the office nearest to you to demonstrate by actual working test what the Comptometer will do on any or all the figure work in your office.
