

U-BOAT TRAPS MADE BY PORTLAND MAN

H. G. Rich Withholds Details of Electrical Mine Device to Destroy Divers.

PLANS ARE AT WASHINGTON

Mr. Rich has already placed his device and plans for its manufacture before the Government. He was not able, of course, at this time to give specific information as to what it may consist of to the bureau in the Chamber but the work that his submarine trap and mine will do, according to his general outline, will be to guard and protect all channels, coves and inlets on the coast and prevent hostile U-boats from entering at any point.

Mr. Rich is in touch with the Washington authorities through the activity of Senator George E. Chamberlain. Before sending complete plans and specifications of construction Mr. Rich desired to ascertain through the industries and manufacturing bureau of the Portland Chamber of Commerce the manufacturing facilities of Portland with a view of obtaining a Government order here of at least a number of the parts that go to make up the trap and mine.

Shipbuilding facilities are not available owing to the machinery being too large for light manufacture. Facilities for light work, such as automobile manufacture and foundry facilities for light castings, will, however, fill the requirements in the construction of the parts of the trap and mine device.

U-Boat Trap Invented.

Mr. Rich has already placed his device and plans for its manufacture before the Government. He was not able, of course, at this time to give specific information as to what it may consist of to the bureau in the Chamber but the work that his submarine trap and mine will do, according to his general outline, will be to guard and protect all channels, coves and inlets on the coast and prevent hostile U-boats from entering at any point.

Mr. Rich is in touch with the Washington authorities through the activity of Senator George E. Chamberlain. Before sending complete plans and specifications of construction Mr. Rich desired to ascertain through the industries and manufacturing bureau of the Portland Chamber of Commerce the manufacturing facilities of Portland with a view of obtaining a Government order here of at least a number of the parts that go to make up the trap and mine.

Details Are Withheld.

The vital factor in a device of this character is keeping the construction a secret, consequently no detailed information as to the type and construction is available.

In general, the trap and mine is of a flexible type and will fit into any channel or inlet, according to Mr. Rich, regardless of the depth and weather conditions, and will absolutely guard the locality from submarine operation; also, it will save a large corps of patrols as a single patrol can serve a large area.

Operation Is Electrical.

The mine is electrically operated and, when a submarine comes in any contact with the trap, it closes an electric circuit that causes the discharge of high explosives to be discharged on the submarine, which, unconscious of any danger, comes in contact with the set trap without any indication of meeting an obstruction, and the results that follow prevent any knowledge of what caused the loss of the submarine.

This factor may be a great advantage to this country or the allies that have the trap or mine in charge, as the installations will be kept secret and the mystery will be guarded as to what became of submarines that never returned.

Mr. Rich proposes to turn all plans and specifications over to the government free of charge, as, being beyond the age limit for personal service in the ranks, he feels like doing his bit along the line of his profession.

RED CROSS CLASS IS SET

Mrs. S. T. Hamilton Will Give Instruction in Knitting Tomorrow.

All details are completed and materials on hand and tomorrow morning from 9:30 to 12 Mrs. S. T. Hamilton will be at the military relief workshop of the Portland chapter, American Red Cross, eighth floor of Lipman, Wolfe & Company, to give instruction in knitting. The work will be concentrated on socks, bed socks, cotton knitted wash cloths and wipers or spongers.

Mrs. Hamilton has done a great deal of knitting in Canada for the British Red Cross. The knitting classes will be held every Tuesday and Friday from 9:30 to 12 o'clock.

Mrs. Thomas D. Honeyman is in charge of the work on surgical dressings and application may be made to her.

The really big Red Cross event of today is the lecture to be given at the Broadway Theater at 8:15 by Dr. Ralph C. Matson on "Impressions of the European War."

REDUCING SUGAR IN DIABETES

To demonstrate to Life Ins. Co. and Physicians that sugar waxes and symptoms can be checked in many cases of Diabetes and lives prolonged we will donate the treatment for a limited number, age 45 and over, showing 5 per cent of sugar or more anticipating it will in most cases, reduction of 50 per cent in 30 days, urinalysis to be made by a competent analytical chemist and mailed every 15 days. All names withheld. Fulton's Diabetic Compound (Fulton's Compound No. 2) is the agent.

It is saving life insurance companies thousands by prolonging lives of old policy holders who have developed sugar and accompanying symptoms. For reports on cases in which the sugar load and symptoms were checked and lives prolonged 3 to 15 years and still living, write John J. Fulton Co., San Francisco. Prizes supplied by nearest wholesaler. No further notice for 60 days.

PORTLAND GIRL WHO HAS BEEN WON AS BRIDE BY YOUNG NEW YORKER, WHOSE SUDDEN RISE IN BUSINESS IS MODERN MERCANTILE EPIC.

C. L. ALLEN TO WED

Miss Katherine Warner Will Become Bride in June.

Miss Katherine Warner, daughter of Mrs. D. D. Warner, 724 Hancock street, in Irvington, will leave this week for New York city to become the bride in June of C. Louis Allen, president of the Pyrene Manufacturing Company, whose meteoric rise in business the last two years has been a sensation in the business world and especially of the world of expert salesmanship.

CEREMONY TO BE IN EAST

Flance's Meteoric Rise to Presidency of Pyrene Manufacturing Company Makes Sensation in World of Salesmanship.

Miss Katherine Warner, daughter of Mrs. D. D. Warner, 724 Hancock street, in Irvington, will leave this week for New York city to become the bride in June of C. Louis Allen, president of the Pyrene Manufacturing Company, whose meteoric rise in business the last two years has been a sensation in the business world and especially of the world of expert salesmanship.

Miss Warner's engagement was announced quietly a few days ago by relatives of Portland, and the announcement explained in a measure the trip of Allen to the Pacific Coast early in January, when he spoke before the Portland Ad Club.

Mr. Allen's rise from salesman to president of his company in less than two years made him one of the most talked-of young men in business of the day, and several magazines and newspapers devoted generous space to an account of the modest young man's rise. He is only 33 years old.

Miss Warner O. A. C. Graduate.

Miss Warner is a graduate of Portland Academy and of the 1915 class of the Oregon Agricultural College, and the romance which takes her on a pre-bridal tour to New York City this week was begun about two years ago, when she was visiting with relatives in New York and casually met Mr. Allen.

Mr. Allen continued to press his suit notwithstanding his sudden rise to international business notice and the betrothal resulted from his recent tour to the Coast. Miss Warner, who is a domestic science expert, has been attached to the Portland public schools since 1914 and has been known for her plans for leaving that the engagement was announced.

Mr. Allen is a resident of Aberdeen, E. D. In less than another year his board of directors recognized his ability and rewarded it with making him president of the concern a year ago last February. As the "most successful salesman" of the year, he was featured by business writers and business experts so persistently that his success became international by word among ambitious salesmen. The engagement to Miss Warner, a Portland girl, capped the year of notice that had been accorded to him and the wedding is set for late in June in New York City.

Miss Warner was reared in Portland and has a host of friends. She was educated in the public schools before attending Portland Academy and the Agricultural College. Mrs. Warner will attend her daughter at the wedding, and there will be a number of other relatives at the ceremony. Mrs. Lewis F. Doherty, of Portland, is an aunt of the bridegroom-elect.

WEDDING IS SET FOR JUNE

Miss Katherine Warner, daughter of Mrs. D. D. Warner, 724 Hancock street, in Irvington, will leave this week for New York city to become the bride in June of C. Louis Allen, president of the Pyrene Manufacturing Company, whose meteoric rise in business the last two years has been a sensation in the business world and especially of the world of expert salesmanship.

Runaway Team Killed

Milk Driver Slightly Injured by Crashing Into Car.

Joe Leu, milkwagon driver, was slightly injured, one of his horses was killed and the other so badly injured that it had to be shot, when his team crashed into a Mount Scott car at East Fifty-fifth and Division streets. Leu told police officers that the brakeman on the wagon refused to work, and that the team becoming frightened ran away. The horses raced down Division street and crashed into the rear car of a Mount Scott train.

Leu was taken to the emergency hospital in the police automobile and his injury, a cut on the forehead, was dressed by Dr. Rose. Leu is employed

Miss Elizabeth Kattenbach.

LEWISTON, Idaho, May 6.—(Special).—Miss Elizabeth Kattenbach, of Lewiston, Idaho, said by Senator Borah to be the most attractive young woman in Washington, has received the highest graduating class honors at the National Park Seminary at Washington. From a student body of 140 Miss Kattenbach was chosen "Queen of the May." The honor is based upon beauty and scholarship. She is the first student from the West upon whom this honor has ever been conferred.

Miss Kattenbach has attended the seminary two years. Her mother, Mrs. William F. Kattenbach, will go to Washington to attend the graduating exercises.

Capital's Most Beautiful Girl Is Selected May Queen.

ST. HELENS, Or., May 6.—(Special).—The first four days of the fishing season have been successful for the fishermen operating out of St. Helens the catch having been more than 50 tons. The fish are of good quality and average 20 pounds each, and the fishermen are paid 10 cents a pound, so that more than \$1000 has already been paid. The run is heavy and fish buyers anticipate a good season.

Ship Plant Site Inspected

Portland Lawyers Visit Tacoma Properties, but Tell No Plans.

TACOMA, Wash., May 6.—(Special).—Clarence M. Eubanks and F. L. Phipps, Portland lawyers, headed a party of Portland men who spent Friday and a part of yesterday in Tacoma, looking over a site on which to locate a yard for the building of wooden ships. They were impressed with a strip of ground offered to them on the tidelands by John L. Roberts, president of the Puget Sound Iron & Steel Works.

Mr. Eubanks or his associates would probably be interested in the property, but they met them would not say that the visitors had made a decision regarding the purchase of the tideland site.

LUMBER SHIPS LOAD

Two Cargoes for San Pedro More Than 1,500,000 Feet.

WAPAMA WILL SAIL TODAY

Declaration of War Increases Difficulty of Securing Vessels for Lumber Carrying, but Several Are on Way North.

More than 1,500,000 feet of lumber will be taken out of the Columbia River for San Pedro aboard two steamers, which were shifted down the river yesterday for the purpose.

The vessels are the steamer Shasta and the steamer Daisy Freeman, both of which got into the river last Thursday. The Shasta, which is in the service of Dant & Russell, was shifted from the Inman-Poulsen mill down the river to Kalama yesterday, where she will complete a cargo of 300,000 feet.

The Daisy Freeman, of the Freeman Steamship Company, completed discharging general cargo here and was taken down the river to Westport. She will take out about 800,000 feet of lumber.

The steamer Wapama, which is due to leave St. Helens for California ports today, will take out 1,000,000 feet of Oregon fir in addition to passengers.

There are several other vessels now loading lumber at Portland and Columbia River mills. These vessels in the aggregate will take out several million feet of lumber, and are due to the general activity in lumber shipments.

Although a somewhat increased difficulty in securing vessels for lumber carrying on the Coast has been experienced as a result of the declaration of war by the United States, there are nevertheless a good list of vessels due to handle lumber cargoes here in the near future.

The steamer Necanicum and Tiverton will be here shortly from San Pedro and will load lumber for the California trade. The two vessels together can handle well over 1,000,000 feet of lumber. The Necanicum is in the service of the Hammond Lumber Company and the Tiverton is operating for the Beaver Lumber Company.

WHEAT MOVED TO RAILROADS

Million Bushels Remaining in Snake River Warehouses.

LEWISTON, Idaho, May 6.—(Special).—Steamer Inland Empire, of the Dalles-Celilo Transportation Company, departed from Portland May 4 and will arrive at Lewiston May 7 or 8, at which time it will be placed in the service of the O.-W. R. & N. Company to work in connection with steamers Spokane and Lewiston in the movement of grain now in Snake River warehouses.

There are remaining in the river warehouses more 1,000,000 bushels of grain to be handled by the boats, said E. R. Budd, superintendent of water lines, and the boats are now moving about 12,000 bushels daily.

Wages for deckhands, formerly \$35 a month with board and room, have advanced to \$60 a month.

SHIP PLANT SITE INSPECTED

Portland Lawyers Visit Tacoma Properties, but Tell No Plans.

TACOMA, Wash., May 6.—(Special).—Clarence M. Eubanks and F. L. Phipps, Portland lawyers, headed a party of Portland men who spent Friday and a part of yesterday in Tacoma, looking over a site on which to locate a yard for the building of wooden ships. They were impressed with a strip of ground offered to them on the tidelands by John L. Roberts, president of the Puget Sound Iron & Steel Works.

Everybody is anxious at this time to buy in the most economical way—in a way that really saves and does not waste. When you buy SNOW FLAKES in this big wooden box you get BIG VALUE for your money, and SNOW FLAKES are good till the last one is gone.

Your grocer will recommend your buying SNOW FLAKES in our new ECONOMY BOX because he knows that you will be pleased with the saving you make and the excellent quality of the crackers.

Don't ask for Crackers

DANGERS AT HIP CLEVER

FINE WORK ON ROLLER SKATES IS NOVEL EVENT ON BILL. Singing Violinist Has Unusual Array of Instruments—Acrobatic Act Is of Rapid-Fire Kind.

Bert and Hazel Skatells maybe aren't headlined as the most particular and illuminating star act in the vaudeville act that the Hippodrome in the new bill that opened yesterday, but they have an act that is about the most startling thing of its kind that the average vaudeville fan ever had the privilege of watching.

They are on roller skates and anyone who has gone through the tyro stage in learning to handle rollers knows that a person who can dance on them is pretty clever. But then we have all seen the experts who figured out gliding, swooping, circling waltzes—and thought they were pretty clever, which they may have been. The Skatelle duo goes everybody one better.

Ward, Bell and Ward have an acrobatic stunt that is tremendously speedy and full of comedy stunts, interspersed with clever dancing.

Henry Kubick, singing violinist, has several startling freak instruments, among which is a banjo that looks like a cross between a banjo and a sither, and with which he is able to make an excellent imitation of a Hawaiian steel guitar.

"Uninvited" is a bright society sketch, featuring Cathryn Chaloner and company, is an engaging story of a clever girl, who outwitted a sharper.

Anita Arliss, former musical comedy star, has a delightful revue of songs, past and present. She is assisted by Arthur Alton.

"A Duo in Contrast" are La Vere and Palmer, with a singing and talking sketch that is entirely worth while.

Another episode in "The Great Secret" featured the public that until after the war the Northern Pacific will quit serving "great big" in the interest of food economy. He points out that these potatoes are so "great" and so "big" that it is a physical impossibility for any one individual to eat a whole potato, with the result that a large portion of each one is wasted.

"BIG BAKED POTATO" GOES

Waste Causes New Order Regarding Service on Dining Cars.

Hazen J. Titus, the irrepressible dining-car superintendent of the Northern Pacific and the man who made the "big baked potato" famous, has pulled another rare piece of advertising—and incidentally contributed substantially to the food conservation campaign.

In a circular issued yesterday Mr. Titus advised the public that until after the war the Northern Pacific will quit serving "great big" in the interest of food economy. He points out that these potatoes are so "great" and so "big" that it is a physical impossibility for any one individual to eat a whole potato, with the result that a large portion of each one is wasted.

Upon the resumption of normal conditions we shall be glad to restore the

H. B. JAMISON'S LEG BROKEN

Jefferson High Athletic Coach Suffers Injury in Ball Game.

Homer B. Jamison, member of the teaching staff of Jefferson High School, ex-University of Oregon athlete and now coach of the Jefferson athletic team, sustained a fracture of both bones in his left leg at the ankle Saturday while playing a game of baseball with the Multnomah Amateur Athletic Club team against Mount Angel at Mount Angel, Or.

Mr. Jamison was sliding into second base when he turned his ankle and it snapped. The joint was thrown out badly and the break of both bones also occurred.

He was brought by automobile to Portland and taken to the Sellwood General Hospital, where his leg was set.

BODY TO GO TO WASCO

Burial of Late W. M. Barnett Will Be Held at Old Home.

The body of W. M. Barnett, one of the early residents of Wasco, who died at the Good Samaritan Hospital Saturday following an operation, will be sent to Wasco today for burial.

Mr. Barnett was 61 years of age. He had lived in Eastern Oregon most of his life, settling there first as a farmer. Later he went into the milling business, then established a general merchandise store, and last went into the banking business, in which he was actively engaged at the time of his death.

Mr. Barnett is survived by a widow and eight children. One of the daughters is married and lives in this city.

RAILWAY OFFERS LAND USE

Southern Pacific to Permit Farming of 100,000 Acres.

More than 100,000 acres of productive land in Oregon, Washington, Idaho, Montana, North Dakota and Minnesota will be farmed this year, as a result of an offer recently made by J. M. Hannaford, president of the road, to its employees.

Under terms of Mr. Hannaford's offer all employees will be permitted to raise foodstuffs on any of the company's idle land, without cost, during the present crop season.

Some of the Northern Pacific right of way, which ordinarily is kept green and attractive like a park, will be plowed up and planted to potatoes and other kinds of vegetables.

After the employees have had a chance at the land, all that remains unused

Bootlegger Sent to Penitentiary

LEWISTON, Idaho, May 6.—(Special).—Harry Floyd, charged with violation of the prohibition law, was found guilty by a jury in the District Court and will be sentenced to the State Penitentiary. Marguerite Floyd, his wife, was arrested upon the same charge, pleaded guilty three weeks ago.

More than 67,000 marriage licenses were issued in New York City during the last year.

AGED WOMAN

Run Down and Feeble—Made Strong by Vinol.

So many people in Portland and vicinity are in Mrs. Wickersham's condition we ask you to call at our store and get a bottle of Vinol, and if it fails to benefit we will return your money.

In her eighty-second year Mrs. John Wickersham, of Russellville, Pa., says: "I was in a run-down, feeble condition and had lost flesh. A neighbor asked me to try Vinol, and after taking two bottles my strength returned; I am gaining in flesh, it has built up my health and I am feeling fine for a woman of my age, so I get around and do my household work."

The reason Vinol was so successful in Mrs. Wickersham's case was because it contains beef and cod liver peptones, iron and manganese peptonates and glycerophosphates, the very elements needed to build up a weakened, run-down system and create strength.

Right here in Portland we have seen such excellent results from Vinol that it is a pleasure to know it is doing so much good for old people in other parts of the country. The Owl Drug Co., Portland, also at the leading drug store in all Oregon towns.
