Enthusiastic Audiences Attend Series of Meetings to Aid in Production.

HALF HOLIDAY IS DECLARED

Polk and Yamhill Farmers Report Crops in Most Promising Condition and This Is Verified by Addison Bennett.

BY ADDISON BENNETT. SHERIDAN, Or., May 8.—(Special.)—
We put in the morning and up to 2
P. M. at Dallas, and in some respects
it was the most satisfactory town we have yet visited, and the only one where the co-operation of the business

men has been given without stint.

They went to the extreme length of calling a half hollday, and all the places of business were closed until noon. This was such an unusual proceeding that our party is unanimous in the opinion that the good people of Dallas are going about their prepared-

ness in dead earnest and are sure to land well up among the committees doing the most efficient work. The meetings were held in the cars and at the high school building, and every lecturer received the closest attention, the audience being above the average in numbers. A fine steering committee was formed. It is composed of R. O. Steelquist, representing the Commercial Club, chairman; Mrs. Oscar Hayter, of the Woman's Club; Mrs. H. C. Eakin, of the Red Cross; Hallie Smith, of the Honor Girls; Elmo Ben-nett, of the Cadets; Jack Sibley and

When our train pulled into Sheridan we found the streets will filled with residents out to give us a welcome. It was only a few minutes until lectures were being given on the cars and at the high school building. All the afternoon the lecturers and Miss Cowgill's demonstrations have held the stage and always to interested audi-

gave her canning demonstration. Miss Cowgill is well advertised in this section. She is a general favorite; the people believe in her and her methods.

We leave here at 7:25 townselve. We leave here at 7:35 tomorrow morning and sp | the day in McMinnwille and Newberg. We passed through a good portion of Polk and Yamhill counties today, and if the country ever looked better, nobody seems to remem-ber the time. I heard more than one farmer say today that he never saw vegetation make a finer growth in the same length of time than during the past week. It does not seem at all probable that there will be any frost. If this proves the case, and other conditions go along favorable, I ik and Yamhill will give a good account of themselves when the crops are har-vested this Fall.

Careless Use of Soap Spoils the Hair

Soap should be used very carefully, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is just ordinary mulsified cocoanut oil (which is pure and greaseless), and is better than the most expensive soap or anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply

be given the new regiment has been reached.

The force will go as regimental units. There was no indication at the War Department that a general officer to command the Army of skilled railway men that will be assembled as quickly as possible would be assigned. It is assumed that the purpose is to place each regiment in charge of a certain section just back of the fighting front, which will form the connecting link with the regular transportation systems of France for the handling of army supplies. Each company will be a skeleton railway construction and operation unit.

Engineers' units are employed as such and never assembled as brigades for even regiments except for parade purposes, with which the new forces have nothing to do.
