City and town committees are formed in addition to the state committees. A county division also may be formed. The object of the organization is to co-ordinate the women's organizations and their working forces to enlist aid in the greatest possible number in the service which the war demands. Each state and community will find different problems to solve, and the league will consider these problems.

DOMESTIC SCIENCE BY LILIAN TINGLE. Text: Portland, Or., April 13.—My Dear Miss Tingle: I would like a recipe if possible of "prune" that is made of bread dough I think, but it is very light and yellow and slightly sweet. They have seeds on top and are very soft, but not rich. Also do you "cook" the yolks of eggs with the whites? I have a recipe that tells how to mix it, but does not say anything about cooking it, and as the prunes have been previously cooked I did not know just how to finish it. Also could figs or apricots be prepared the same way? Trusting this is not asking too much I thank you in advance. E. C. B.

DOMESTIC SCIENCE BY LILIAN TINGLE. Text: Portland, April 16.—Dear Miss Tingle: I have no roll recipe exactly corresponding to your description, but perhaps some reader may help us. The prune whip may be either cooked or uncooked. For the former it is baked like an ordinary soufflé in a baking dish set in hot water, and may be served hot or cold. For the latter the prune pulp and sugar should

LESLIE SALT ask for the side-spout package. A Mother Made This Chart. She had two babies—Margery and Joan. When Margery had to be weaned she put her on modified milk, then on one baby food after another. Margery's weight kept going down, and she was pulled through the weaning time by a narrow margin.

Nestlé's Food. (A Complete Milk Food—Not a Milk Modifier). There's nothing mysterious in Nestlé's Food. It's just the nearest thing to your own milk that doctors and scientists have been able to make. When your baby can't have your own milk any longer, he must have milk in some form. Nestlé's Food is pure milk from healthy cows, to which is added malt-wheat, biscuit and cane sugar, scientifically blended so as to be just right for your baby. It comes to you, a clean, dry powder, packed in airtight tins. To prepare, you simply add cold water and boil a minute. It is easy for you. It is absolutely safe for your baby.

So when Joan had to be weaned, she put her on one on Nestlé's Food and you can see by the chart what happened to Joan's weight. Weaning time was an easy time for Joan and for Joan's mother. We have made a large chart like this (a blank chart of course), and you can have it for your baby's story, week by week, if you'll send the coupon below.
