

ALL IS READY FOR WAR CENSUS TODAY

Final Instructions Given to Registrars for Precincts and Central Districts.

NO TROUBLE IS EXPECTED

Estimate Is That 10,000 Will Be Enrolled and Force Is Engaged to Commence Tabulation of Lists Without Delay.

SALIENT FACTS ABOUT WAR REGISTRATION.

Every male in the United States between 21 and 30 years, inclusive, must register today for war service. Registration must be made at the regular voting place of each city precinct in Portland between 7 A. M. and 9 P. M.

Portland and Multnomah County are in readiness to take the Government war census registration today. Under the direction of Adjutant-General White, the city and county officials have arranged every detail in connection with this work and Sheriff Hurlburt, chairman of the central registration board, announced last night that all plans were complete.

No Trouble Expected. Although there have been a few rumors of disturbances in some of the precincts of the county, Sheriff Hurlburt said yesterday that he did not look for any trouble of any kind. Deputy Sheriffs will stand ready throughout the day and evening to answer any emergency call to any precinct of the county.

Clerical Staff Engaged. The central board has arranged for a clerical force to begin work at the Courthouse compiling the registration data immediately after they have been turned in by the district registrars.

TWENTY GET BIG INCOMES

Making Over Returns in Excess of \$100,000 Doubtful.

MINNEAPOLIS, May 29.—Twenty Minneapolis men, it was estimated, would be affected should the Federal Government as a war revenue measure take over all individuals' incomes in the country in excess of \$100,000 a year.

WINNERS

for MAY, the first month in the series of five \$100 contests for \$500.00 in Cash Prizes

offered to those who collect the caps from "R-Porter," "Puritan Club Ginger Ale," "Loganport," "Crabport," "Cherryport," "Orangeport," and all flavors of "Puritan" soda water, will be announced in this paper tomorrow.

popular impression to the contrary. It will be found, however, I am sure, that the rich men will accept cheerfully whatever burdens fall upon them as a war necessity.

Vice-President Chapman, of the Northwestern National Bank, said there are 15 to 20 men in Minneapolis, probably more, who will be affected.

WASHINGTON HIGH SCHOOL GRADUATE NOW SERVING WITH U. S. ENGINEERS.

Wilbur G. Biederman, graduate of Washington High School in the June, 1916, class, is now serving with Company B, Second Mounted Battalion of United States Engineers. At present his company is stationed at El Paso, Tex.

such man is intensely loyal, and that if the time ever comes when the Government needs any part of his income he will give it cheerfully.

NEW POSTMASTER ON JOB

T. G. Patten Succeeds Republican in New York City.

NEW YORK, May 19.—Thomas G. Patten has formally become Postmaster of New York in place of Edward M. Morgan, who had held the office for ten years and was named to make room for his Democratic successor.

Mr. Patten was quietly greeted as he came to his office by the heads of the various departments. He spent most of the morning in conference with them, picking up the details of the various departments.

LUMBER ENOUGH FOR ALL

War Requires Only Five Per Cent of Annual Production.

WASHINGTON, June 4.—Two billion feet of lumber will be required within the next year for war purposes, according to an estimate today by the lumber committee of the Council of National Defense.

PACKERS GET WARNING

Gross Weight of Package Illegal, Says Deputy State Sealer.

SALEM, Or., June 4.—(Special.)—Spence Wortman, deputy sealer of weights and measures, today advised all meat packers in the state that the practice of selling their products in package form according to the gross weight of the package is illegal.

Woman Has 5 Acres, but No Seeds.

TYLRIA, O., May 25.—Mrs. Mary Bach, who lives near here, appealed to the Ohio State University agricultural department for assistance in having potato or bean seed provided her for her five acres of land which she says she is anxious to plant but has no money to purchase the seed.

Roumania to Set Up Legation.

WASHINGTON, June 4.—Roumania will establish a legation in Washington. Roumania recently asked this Government if the establishment of a legation here would be agreed to and has just been told that the United States would be glad to receive a charge d'affaires.

POSSE TO HUNT OUT LAIR OF KIDNAPERS

Motor Car Loads of Citizens Invade Wild Ozarks to Find Keet Baby.

FATHER DISCOURAGES AID

Playing of Lone Hand in Recovering His Child Is Determined; People Fear Lawlessness of Days of Old Is in Course of Renewal.

SPRINGFIELD, Mo., June 4.—Motor-car loads of citizens of Springfield and the surrounding country went into the Ozark Mountains today and tonight in search of the missing Lloyd Keet, 14 months old son of J. Holland Keet, wealthy Springfield banker, with the announced determination of seeking out hiding places from which future abductions might be directed and in which the band responsible for the present crime may be found.

The Keet kidnaping has aroused fears that the former haunts of the lawbreakers might again become the rendezvous of abduction bands and believing that perhaps such a band had established itself somewhere near citizens of Springfield met today and determined to carry out a thorough search.

SENATOR JONES HURT

WASHINGTON STATESMAN STRAINS ANKLE STEPPING FROM AUTO.

Mr. Hawley's Plan to Direct Inland Water Transportation Approved by Defense Council Head.

OREGONIAN NEWS BUREAU, Washington, June 4.—Senator Jones, of Washington, in stepping from his automobile last night, sprained his ankle and is now laid up in bed.

Senator Poindexter, of Washington, and Senator King, of Utah, in the judiciary committee, today insisted upon action on the Jones resolution, submitting a prohibition constitutional amendment to the states for ratification. A special committee is appointed to study the problem one way or another next Monday.

CONTACT SPRAYS BEST

NICOTINE IS FOUND MOST SUCCESSFUL BY ORCHARDISTS.

Poison May Be Brewed at Home From Refuse Tobacco, but Strength May Vary With Varieties.

WASHINGTON, May 19.—According to specialists in the Department of Agriculture, contact sprays are the only effective means of controlling the various kinds of aphids, the small insects which by feeding upon the juices of the plants do much damage to the fruit and foliage of orchard trees, currant, gooseberry and grape.

As the aphids do not eat the plant tissues but drain the sap from them, the various kinds of sprays containing stomach poisons, such as Paris green, arsenate of lead, etc., are ineffective. To do any good the sprays must come in contact with the bodies of the insects and great thoroughness in spraying is therefore necessary.

There are a large number of different kinds of aphids, one or more of which may attack almost every form of orchard and bush fruit. For the most part, however, the same measures of control are applicable to all the species.

These may be controlled successfully by spraying when the buds first show green tips of the foliage. In this way the first brood of the insects is killed and insurance is obtained against injury later in the season.

The importance of early bud spraying is greatest with those species of aphids whose attacks result in curling the leaves of the plants on which they feed. This curling serves to protect the insects to a considerable extent from the contact spray.

Nicotine has been found to be one of the most effective substances for killing aphids, and as it may be applied with great safety to plants it is possibly the best suited of all the substances used in the control of these insects.

It must be remembered, however, that although the addition of soap adds much to the spreading power and efficiency of the nicotine spray, soap must not be used with lime-sulphur solution.

It is also a comparatively simple matter to make nicotine sprays at home if tobacco stems or refuse tobacco are available. In the home manufacture of the solution, however, it is difficult to determine the correct strength of the decoction since the various kinds of tobacco refuse vary greatly in their nicotine content.

In a new publication of the Department of Agriculture, Farmers' Bulletin 804, a table showing the number of pounds of different kinds of tobacco refuse required to make one gallon of solutions of the right strength is given.

In this connection it is pointed out that the stems from which the extract has been made have a value for other purposes of about \$10 a ton.

With tobacco refuse and stems costing about \$25 a ton, the spray solution can be made for approximately 1 cent a gallon, the fertilizer value of the extracted refuse covering the cost of labor, etc.

Washes made of fish-oil or laundry soap are also effective against aphids, and are especially suitable for use on a small scale. The fish oil soap of different brands on the market varies greatly in water content, so that the precise quantity of soap to be used with a given amount of water will vary also.

Manufacturers, however, are required by the Federal Insecticide Act of 1910 to state on the label the amount of active ingredients in the case of fish-oil and laundry soap, 1/2 pound; water, 1 gallon.

As has been already said, soap should not be added to lime-sulphur solution. Nor should lime-sulphur solution be added to kerosene emulsion. This last may be used as a substitute for the fish-oil or laundry soap, 1/2 pound; water, 1 gallon.

The several aphids which occur on the plum, and the green peach aphid, do not curl the foliage to the same extent as do some of the apple aphids, and it usually will be found satisfactory to spray the trees after there are indications that these insects are abundant.

Where the insects have proved troublesome regularly, however, spring spraying may be desirable. In the case of currants and gooseberries it is especially important to spray as the shoots are pushing out, otherwise the insects will soon be protected by the distorted foliage.

When spraying is carried on later in the season the liquid should be directed upward to wet the insects on the under side of the leaves.

A detailed description of the character and seasonal history of the more important of the aphid species is given in the bulletin already mentioned.

Girl Yells and Burglar Flees.

CLEVELAND, May 22.—Miss Rose Rendo just did what a burglar told her not to do when she entered the home of Dr. K. S. West, 1204 Belle avenue, Lakewood, where she is employed. He ordered her to keep cool and not to scream. She screamed and fainting, members of the family hearing her cries, ran downstairs and the burglar fled.

Two other burglaries were reported to Lakewood police the same day. The home of Joseph Schullian, 1479 Mars

POET DESCENDANT FIGHTS KNITTING IS REVIVED

Frances Deuber Resembles Forbear, Francis Scott Key.

BALTIMORE, Md., May 21.—Following in the footsteps of his illustrious ancestor, Francis Deuber, a direct descendant of Francis Scott Key, the author of "The Star-Spangled Banner," is now serving his country in the arm of our National defense which will be "First to Fight"—the Marine Corps.

Private Deuber's mother is a great granddaughter of the author of our National anthem, on the maternal side, Deuber's resemblance of his renowned ancestor is said to be so noticeable that

the city. Mrs. William S. Popham is chairman. So earnest has the revival become that knitters were seen in several theaters last week.

The Navy Department has approved the supplying of sleeveless jackets, mittens and mufflers, if made according to specifications. These comforting articles are not supplied by the Government. In time of war their value is greatly accentuated. Peace maneuvers in winter are held in Southern waters, but in war time there is no choice of time or place, and the open work in small boats may be increased greatly.

Spanish Steamer Is Sunk.

MADRID, via Paris, June 4.—The Spanish steamer Telefora, of 4145 tons, is reported to have been sunk without warning by a submarine. The crew was saved. The home port of the Telefora is Balboa.
