

SENATORS ARGUE 4 HOURS WITH HOOPER

Food Administrator Insists Control Measure Is Needed to Protect Public.

the allies but for ourselves," Mr. Hoover replied. "Even if we had not gotten into the war, we would have been up against this tremendous demand from Europe and probably driven to some legislation to protect our own people."

Mr. Hoover expressly disclaimed authorship, personal interest or responsibility for the bill's provisions extending to fuels, declaring he was only interested in food.

The provisions for commandeering factories, mines and other plants, he added, would not be necessary in administering food questions.

Senator Reed referred to a section which he contended would permit the Government to take from cribs and bins grain stored there in excess of the amount actually needed by the farmer and asked Mr. Hoover's opinion regarding the enforcement.

"As far as I am concerned, I would not attempt to execute it as far as the present situation appears," replied Mr. Hoover.

One Amendment Acceptable.

Senator Gore asked Mr. Hoover if he would deny to the farmer the right to judge the amount of crops he should grow.

"If the Government guaranteed a minimum price," Mr. Hoover replied, "we might not get the beneficial result for the farmer unless we also have the power to limit imports."

Mr. Hoover said "possibly" the bill should be amended to give farmers the right to determine their own production.

"We don't propose to go to the extent of fixing consumers' rations," Mr. Hoover added, "except as to hotels, restaurants, etc., regarding the amount of bread portions to be served and the like. England did a foolish thing in trying to fix maximum prices, a failure wherever tried."

"Do you contend that under the bill you can say to Senator Reed, for instance, that he shall eat a soup bone or a steak on certain days," asked Senator Kenyon.

"I don't think we have any such right nor should we have it," Mr. Hoover replied emphatically. "But we should have the right to suggest the use of a soup bone every day and we can reach any agreement voluntarily."

Law Needless, Says Mr. Reed.

Senator Reed insisted that legislation is not needed to effect such voluntary arrangements, but Mr. Hoover said a law should authorize the food administration to that end.

Mr. Hoover said with all wheat imported, bread prices in Belgium were 60 per cent less than in New York City, while those in England and France are 30 to 40 per cent lower with producers realizing the same prices.

Self-Denial Is Purpose.

"We propose to mobilize a spirit of self-denial and self-sacrifice in this country in order that we may reduce national waste. If democracy is worth anything, we can do these things by co-operation. If it cannot be done, it is better that we accept German domination and confess the failure of our political ideals."

"We have no hope of complete success, but we do hope that we shall succeed so far as to enable this country and the allies to remain constant in this war."

Mr. Hoover denied that the millers have been the speculators in the grain market and said that what action they might have taken in that regard was purely for self-preservation.

Mr. Hoover warned against legislation to prevent dealing in futures.

"If you pass legislation of this kind you might demoralize the trade of the country," he said.

Future Shortage Is Question.

"The real question," he said in a prepared statement preliminary to Senatorial questioning, "is whether the shortage will continue next year and what will be the requirements of the allies and America. Despite the reduced consumption of the allies they will require a larger amount of cereals next year than ever before. The allies are more isolated in food resources. It takes three times the tonnage and double the trouble to get Australian wheat. Crop failures in the Argentine give no hope of relief from there before next Spring."

"The allies are dependent upon North America for the vast majority of their food imports. We should be able to supply 60 per cent of what they require. The other 40 per cent must be made up by further denial on their part and saving on ours."

"We can increase our surplus. The

situation for them next year means increased privation. Without an adequate food supply no European population will continue to fight and we shall find ourselves alone against Germany."

Speculation Is Rampant.

"The Russian revolution was a food riot, and even yet that ally is temporarily paralyzed. Responsibility rests on our Government for failure of democracy through a shortage of food."

Turning to domestic conditions Mr. Hoover said this country had been experiencing "unprecedented prices and rampant speculation, citing now mid-diemer and all other persons in the distribution business have been purchasing increasing supplies to avert individual shortages."

Mr. Hoover cited the canning trade as an example where the entire output of vegetables and fish for 1917 has been disposed of already before it has even reached the canners. He predicted further high prices. Thousands of men, he said, who heretofore have never owned a dollar's worth of food-stuffs are now speculating in necessities.

"The average prices to the consumer in countries where food administration is now in effect are lower than those now prevailing in the United States," he said.

Bread Lower in England.

"In England the price of bread is even 25 per cent below the price we pay. I believe that unless some administration of our food is taken we will look back at these prices as being moderate."

"Provisions for the Government to buy and sell commodities will be necessary for use only as a very few prime commodities. The aim is to stabilize prices and thus eliminate speculation. The balance wheel for stabilizing prices is gone. We need an artificial balance wheel. By setting up a wheat commission we can buy wheat, regulate its storage and transportation and handle it until exported or sold in this country. If we do not do this wheat prices may collapse on account of our not being able to store and carry it, with speculators securing the sole benefit and farmers bearing the loss."

"We can contract tomorrow with the allies for a certain return for every bushel of wheat we can sell. If we do not stabilize prices at interior terminals we can assure millers their supplies and simplify transportation."

Reduction Is Foreseen.

"We feel confident consumers' prices of sugar and flour will be reduced as well as others through our co-operation with leaders of other trades."

"We must have power to license grain elevators so that they may play their part in the team work of the Government."

WIENNA CABINET RESIGNS

Defection Declared Sufficient to Turn Scales Against Government—Anti-German Kingdom Desired.

BASEL, Switzerland, via Paris, June 19.—A Vienna dispatch says that the Austrian Cabinet has resigned.

ZURICH, via Paris, June 19.—The Polish Deputy Dazinski declared in the Vienna Reichsrath that more than 20,000 Poles have been hanged by order of the German authorities, according to the Vienna Arbeiter Zeitung. Pan-Germanist Deputy Heine shouted: "They have not used the rope enough. All of them ought to have been hanged."

At these words all of the Slav and Polish members rushed upon Heine and the President was obliged to suspend the sitting in the midst of a tremendous uproar.

COPENHAGEN, via London, June 19.—The revolt of the Poles in the Austrian Parliament is declared by the Vienna correspondent of the Vossische Zeitung as having produced a Cabinet crisis.

The Vossische Zeitung correspondent, however, points out that the defection of the Poles in Parliament is sufficient to turn the scales against the government. The Poles indicate the seriousness of their intentions by a decision to vote against the budget, being the first Parliamentary group in any European country to do so.

At these words all of the Slav and Polish members rushed upon Heine and the President was obliged to suspend the sitting in the midst of a tremendous uproar.

The Polish aspirations aim at practically an independent kingdom openly on an anti-German basis.

SENATE HONORS McNARY

OREGON MEMBER GETS ASSIGNMENTS EXTRAORDINARILY GOOD. Various Colleagues Resign in Favor of New Lawmaker and Another Place Set for December Session.

OREGONIAN NEWS BUREAU, Washington, June 19.—Senator McNary, by resolution of the Senate, has been assigned to membership on the following committees: Public lands, Indian affairs, Philippines, irrigation of arid lands, public health, Pacific railroads, manufactures and expenditures in the Department of Commerce. He also has been assured that in December he will be made a member of the committee on agriculture.

These assignments are extraordinarily good for a new Senator, and peculiarly so considering Senator McNary's record in the Senate in the past of a session. An additional place was created for him on the public lands committee by resolution of the Senate and various Senators resigned in his favor from the other committees named.

The quality of Senator McNary's assignments is indication of a desire on the part of the Republican Senate membership to hold the Oregon senatorship at the next election.

DEATH OF GIRL PROBED

ADOPTED ORPHAN FOUND DISMEMBERED IN FIRE RUINS. Nebraska State Officials Take Up Investigation on Ranch at Keeline, Wyo.

LINCOLN, Neb., June 19.—The State Board of Control, in charge of the Nebraska Home for Dependent Children and other state institutions, today ordered an investigation into the death of Tressie McCrossin, the 17-year-old ward of the state, recently reported burned to death on the ranch of Mary Harlan, Keeline, Wyo.

Information reaching the board indicates the dismembered and decapitated body of the girl was found in the ruins of the burned ranch house.

Tressie McCrossin was adopted by Mrs. Harlan and was known as Irene. She lived with Mrs. Harlan and the latter's brother, a man named Donahue, who is 65 years old.

It Works! Try It

Tells how to loosen a sore, tender corn so it lifts out without pain.

Good news spreads rapidly and drug-gists here are kept busy dispensing freezons, the other discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers. Ask at any pharmacy for a quarter ounce of freezone, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus. You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue. This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corners.—Adv.
