

GALE DRIVES 100 FIRES MOUNTAIN

Forestry Officials Alarmed by High Wind That Sends Flames Toward Homes.

RESORTS WILL BE SAFE

Ione, Wash., Is Threatened and Populace Spends Day Wetting Roofs in Effort to Prevent Fire From Wind-Borne Sparks.

MISSOULA, Mont., Aug. 26.—A disaster of stupendous proportions is feared tomorrow when a hundred Western Montana forest fires, driven by a gale which arose late tonight, began to gain headway through the mountain valleys about Missoula.

Government rangers today reported a big fire outside the reserve south of Ione, Wash., but it is green timber, and is burning yet, but all other fires in the Santiam National forest are under control.

Logging Company Fire Dies

Small Blazes Reported on Lower River, but Loss Is Small.

ASTORIA, Or., Aug. 26.—While small forest fires are burning in various sections of the lower river district none of them, so far as is known, has entered the green timber, and the property damage is not great.

The fire near Berlin, outside the reserve, is burning yet, and a new fire east of Lebanon on wooded lands was reported last night.

Mr. Rutledge again tonight denied emphatically persistent rumors of men lost in the Lolo and Seelye Lake fires.

One man has been reported missing from a small crew, he said, but the fire was small and the man is thought to have come to town.

Forest fires, which last night seemed to have gotten beyond the control of the local fighters, threatened the town of Ione, Wash., and an appeal for volunteers was sent to the neighboring towns.

At Seattle forestry officials yesterday were worried by the forest fires in Eastern Pacific and Eastern Lewis Counties where the timber is ripe for a dangerous blaze.

NEW FIRES ARE DISCOVERED

Forest Rangers Report Santiam Blazes Are Under Control.

ALBANY, Or., Aug. 26.—(Special.)—Forest rangers fighting the forest fire on the slope of Mount Jefferson reported to Supervisor Hall here this afternoon that they believe they had it under control. It has covered a territory three miles long and half a mile wide, but has burned largely in an old burn and in snow brush. It is above the main timber line, so has destroyed very little good timber.

The fire near Berlin, outside the reserve, is burning yet, and a new fire east of Lebanon on wooded lands was reported last night.

Government rangers today reported a big fire outside the reserve south of Ione, Wash., but it is green timber, and is burning yet, but all other fires in the Santiam National forest are under control.

MACMILLAN HOME

Explorer Returns After Four Years and Reports Crocker-land Is Mirage.

FOOD SUPPLIES ARE LOW

Arrival of Relief Ship Settles Argument in Igloo Over War and Expedition Is Successful Without Single Loss.

SYDNEY, N. S., Aug. 26.—Donald B. MacMillan's Arctic expedition expedition arrived here today on the relief steamer Neptune, after four years in the polar regions.

Macmillan's Arctic Expedition

MacMillan, who was one of Rear-Admiral Peary's lieutenants on his successful dash for the North Pole, confirmed previous dispatches from him that there was no Crocker Land, such as had been reported by Peary.

The first objective of the MacMillan expedition, which was organized under the auspices of the American Museum of Natural History and the American Geographical Society, with the cooperation of the University of Illinois, was to prove or disprove the existence of Peary's Crocker Land, which has been a prolific source of dispute among geographers and scientists.

The health of the explorers was good, and the expedition was to conduct a survey of the Greenland ice cap.

While MacMillan did not deny that he had made some discoveries, he was reticent concerning them, saying he was under orders to report to the Museum of Natural History in New York.

Plans to leave Tuesday for his home in Freeport, Me., and thence to New York. The health of the explorers was good, and the expedition was to conduct a survey of the Greenland ice cap.
