Catch of Fish Still Light. ASTORIA, Or., Sept. 30.—(Special.)—

Mobilizing for the War

Your Uncle Sam is getting ready to fight. All over the country, hundreds of thousands of artisans are busy with war preparations. Great warships are sliding off the ways; navy-yards and arsenals are working night and day; great mobilization camps are springing up as if by magic...

All over the Bell telephone system, thousands of employees are busily engaged in all branches of telephone activity, to keep pace with the extraordinary telephone needs of the Nation. Everywhere poles are being set and wires strung, central office equipment increased, new long-distance lines constructed between important points and telephone facilities increased.

The greater and more varied the Government's war activities become, the greater will be the demands upon the Bell system for service. With the increased Government requirements, there will be greater demands for commercial service. The scarcity of material and labor have set definite limits to the amount of new construction, and the needs of the individual must be subordinated to those of the Nation.

It is going to be harder to supply new telephones, extension telephones and to put up wire to new telephone stations, because of the vast amount of telephone equipment devoted to the service of the Government, and because the Bell organization has contributed heavily to the draft, and many of our technically trained men have voluntarily joined the colors.

When you use the telephone, we ask you to remember the patriotic service we are rendering the Government, the extraordinary conditions we are facing, and to help us maintain good service by a conservative use of your telephone and equipment.
