LONDON, Nov. 2.—James Ian Macharland, Parliamentary Secretary to the War Office, in reply to newsy aper articles today said no doubt had been expressed by General Cadorna or the tailian government to the British skift for the Italians' ability to meet the Austro-German attack which they knew was about to be made against them. No request was received that Lieutenant-Colonel John Leader, then in charge of an officers' training camp, had been released and would sail as soon as arrangements could be made. No further information regarding Colonel Leader has been received, but it is hought probable that he is now on his way and will be in Eugend in time to organize the drill course and have it ready when the second semester open.

SALEM. Or., Nov. 2.—(Special.)— Practically at the end of its string with the \$7560 appropriated by the last Leg-islature for creating and operating a state grain inspection department, the Public Service Commission today sent out letters to a large number of grain men of the state to determine whether they will get behind a move to ask the Emergency Board for \$5000 more to tide them over.

RULE EFFECTIVE JAN. 1

Licutenant-Colonel Lender, British Vet eran, to Serve as Military In-

structor, Fails to Arrive.

UNIVERSITY OF OREGON, Eugene Nov. 2 .- (Special.) - The University faculty at its regular meeting yesterday adopted the report of a special committee, which will make it compulsory for all students to wear military unlforms, beginning with the opening of

average, and is as follows: The state grain inspection department is under the supervision of the Public Service Commission, and as you probably know the sum of \$7500 was appropriated in the act which created this department, it being the evident belief of the Legislature that such amount would be sufficient to purchase the necessary equipment, establish and maintain the office until such time as the fees re-ceived from the inspection of grain, ware-house licenses, etc., were sufficient to make the department self-sustaining. By the pro-visions of the original bill as introduced the amount appropriated was \$20,000, but prob-ably due to the passage of the 6 per cont tax limitation amendment, this amount was re-duced by amendment of the ways and means committee to the sum of \$7500, with the re-sult that the appropriation now is practically exhausted; the fees received from various sources being insufficient to maintain the department dring the development period. Bituation Parity Relieved.

Situation Farily Relieved. Situation Farily Relieved. The situation has been temporarily re-lieved by the co-operation of the raifroad companies so that the expenses for the cur-rent month (October) will be met, after which time it doubtless will be necessary to have relief from some source or to elimi-nate a large part of the expenses now in-cident to the inspection and grading of grain.

There seems to be only three remedies, one being the reduction of the force now em-ployed, another an increase of fees and a third an appead to the Emergency Board for standard of the department. The first rem-edy is objectionable in that it incurs the necessity of delaying the weighing, handling of revenue and efficiency, to say nothing of the inadvisability of delaying the present car government" for the prompt movement of all for the reason that seattle and Sound for fevenue are charging the same rate of fees as Oregon. If this Commission were to fast and the demarks of the ship of the inadvisability of delaying the same rate of fees as Oregon. If this Commission were to fast the prine of inspection at Oregon photons, it would, no doubt, result in many ship fees and others thus would relieve the shippers and others thus would relieve the shippers, millis, watchousemen and vari-ous other organizations throughout the source of the ship is of the stroughout the source organizations throughout the source of the stated. grain. In justification of such action it may well be said that the Oregon statute providing for the impection and grading of grain follows very closely that of the State of Washing-ton, the fees for such grading and inspec-tion being identical.

declared War Secretary Baker last week, and almost on the same day, Lloyd George announced that he could "see no road to peace but in victory."

Without ignoring any of the shadows in the outlook, Allied observers are unanimous in their conviction that the Central Powers are cracking under the strain. In proof of this they point to the recent brilliantly successful French offensive on the Aisne front. when in one day's fighting General Petain's troops advanced two miles on a six-mile front, capturing 8,000 prisoners and 70 big guns; to the ceaseless methodical advance of the Ypres wedge by Haig's steam-roller tactics; to the heavy toll taken of Germany's naval forces by the Russian fleet in the Gulf of Riga battle, when fifteen German war-ships were put out of action; to the capture by the French of four super-Zeppelins in one day; to Germany's heavy withdrawal of troops from the Riga front to make possible an Austrian offensive against Italy; and to the ominous rumors of a growing spirit of mutiny in the German and Austrian fleets.

Military Genius Shown. The withdrawal of the heavy guns and the munitions supplies revealed a military genius of the highest order, but the civilian crowds added to the difficulty of the huge military remov-al. A torrential rain increased the hardships of the soldiers and added to the misery of the women and children, who had walked seemingly endless miles over the roads and through the fields all pight.

Sunday morning, at a railway cross-ing, a steady succession of flatcars as-sisted in the removal of the artillery. The monster guns were mounted on double cars, with a covering of boughs as a screen against air raiders. The rain was providential, as clear weather would have permitted the enemy air-planes to bombard the roads and block the withdrawal.
