Fight Your Rheumatism With the Right Ammunition

Take Every Advantage of This Relentless Enemy. Fighting disease is the most important warfare known to mankind, because we are all subject to its attack.

One of the most common foes is Rheumatism, which attacks with relentless violence and often leaves its victim entirely helpless. Rheumatism is so often successful against its victim because the wrong ammunition is used against it.

Too many people make the mistake of treating only the symptoms and entirely overlooking its source. They are so anxious to find relief from its torturing pains that they expect local applications of liniments and lotions to accomplish what is impossible.
