of way and other unused lands of the company for garden purposes. Such lands that were not used by the employees were leased free of charge to those not able to pay a nominal rental. The same practice will be followed this year.

The present food and labor situation is such that it is the patriotic duty of citizens to supply as far as practicable their own food at home, thus economizing in both labor and transportation.

Every Tuesday, Thursday and Saturday afternoon finds an interested group of housewives in attendance at the regular instruction in the preparation of fish which are given by Mrs. J. D. Spencer.

Instructions for the preparation of smelt is a Hoover have been so in demand that Mrs. Spencer repaired her directions again yesterday.

Another delicious dish which was prepared yesterday was scalloped roe. As a rule, roe, which is removed from the sole, is thrown away because the housewife does not know how to prepare it.

On Saturday afternoon at noon the county school teachers will be guests at a luncheon to be served at Lincoln High School. The Municipal Fish Market will supply the black cod, which will be stuffed and baked under the direction of Mrs. Spencer.

SINGLE PLANT AIM

Dairymen's League Plans Co-operative Distribution.

BIG SAVING CONTEMPLATED. Option Taken on System Established in Old Gambrinus Brewery Building—Purpose Is to Eliminate All Waste Energy.

A co-operative milk distributing plant controlled by milk producers, members of the Oregon Dairymen's League, is to be established in Portland if a move now under way is consummated.

It is primarily an effort to get rid of the middleman, the sweetest and pays the producer as little as possible for his milk and charges the public as much as possible, said Mr. Katz.

For example, each dairyman is now distributing milk on a route of his own. These routes interlap and overlap until there is vast waste by the duplication.
