President Calls Senators Into Conference and Urges Defeat of Bills.

### STRUGGLE SEEMS CERTAIN

Associates of Chamberlain in Pending Legislation Reported to Be Preparing to Deliver Addresses Next Week.

WASHINGTON, Feb. 1.—In emphasizing his opposition to the Senate military committee's hills for a war cabinet and a munitions director. President Wilson urged upon another group of Democratic Senators called to the White House today the necessity of avoiding as far as possible agitation in Congress that might encourage the enemy and give the impression of discord. The President, according to those attending the conference, in forceful fashion reiterated his objections to the proposed legislation and declared he would not consider a compromise on them.

He said both bills were obnoxious to him, both because they were unnec-essary and because they would em-barrass and deprive him of authority cuting of the war.

Although all the Senators present were said to be in entire accord with the President's position and confi that legislation is certain of defeat, they said Senators Hitchcock (Demo-crat) and Wadsworth (Republican) were planning speeches in the Senate carly next week in support of the bills and could not be stopped under the Sanate rules.

Replies are planned on behalf of the Administration, and Administration leaders hope with that discussion the debate can be closed. They hope to be able to prevent the bills from being reported by the committee, but in any event they are confident of mustering enough votes to prevent their being formally brought before the Senate for

The President's position, it was indicated tonight, will not affect the plans of Senators Hitchcock and Wadsworth for delivery of their addresses Monday and Tuesday, respectively.

Questionnaires Mailed to 30,000 Sawmills Throughout Country by Forest Service.

WASHINGTON, D. C. Feb. 1.—A cen-us of the lumber production of the ountry during 1917 is to be made by the Forest Service in co-operation with the National Lumber Manufacturers' Association, as in past years. Ques-tionnaires have already been mailed to the 20,000 sawmills throughout the country asking that the amount of each kind of lumber cut be reported

promptly.

It is pointed out by officials of the Forest Service that the lumber census is of particular importance at this

ime, because of the large quantities of special material needed for the con-luct of the war. Several of the Gov-rnment departments, they say, depend-ipen the Forest Service for data and technical advice on subjects connected with lumber. Since the entry of the United States into the war this demand has been greatly increased. In many cases the information gathered by the Forest Service in previous years has made it possible to determine at once where certain classes of material could be obtained in the largest quantities and consequently has enabled the Government to get in direct touch with the proper mills without loss of time.

Because of unsettled conditions in the lumber trade in 1917, it has been somewhat difficult to judge the current production. Heavy calls for lumber made by the Government have been partially ffset by transportation difficulties nd scarcity of labor. Officials say that t will require a careful census to de-ermine whether the output was more or less than preceding rears. They point out at the same time that the lumber manufacturers can aid the work materially by filling out and returning promptly the questionnaires that have been sent them.
