# Why German Workingmen Cry "Peace and Freedom!

We in America must not exaggerate, of course, the reports of strikes, peace-parades, and even peace-riots that are filtering through the stone-wall censorship established by the beneficent Kaisers of Mitteleuropa over their happy peoples, but when audiences in Germany drown out "Deutschland über Alles" by roaring the "Marseillaise," with its wild call "to arms" against "tyrants" who "lash and goad "us," outsiders can hardly be blamed for suspecting that something is stirring.

When in Frankfort in January the Fatherland party tried to hold a meeting to elucidate their plan to extend the Fatherland over all neighboring territory (at the expense of the lives of the fathers and brothers of the people in the audience), the said audience burst into shouts of "Peace and Freedom!" started the "Marseillaise," and, according to the Vorwarts, poured through the streets "like an avalanche," while the populace at the windows greeted them with waving handkerchiefs and shouts of encouragement, which led to the smashing of the windows of the local annexationist newspapers."

In THE LITERARY DIGEST for February 9th there is a careful analysis of all the news from all sources bearing upon this potentially significant phase of the war. Other striking articles in this number are:

## How President Wilson Is Waging War

A Digest of Secretary-of-War Baker's Defense and the Editorial Comment of Newspapers of All' Political Persuasions Upon the Administration's Conduct of the War

## Are You Going to Build?

If you are, whether it be a private residence, a building for industrial or manufacturing purposes, a skyscraper, or any sort of a building, you will be interested in reading the announcements of the building-material manufacturers appearing in this week's issue of THE LITERARY DIGEST.

There is a wealth of practical information here that is not only interesting but of much importance to everyone who would keep abreast of some of the important developments and advances made in materials that enter into the construction, equipment, or decoration of modern buildings.
