

DRAFT INCREMENTS TO MOVE THIS WEEK

Small Bodies of Men Needed to Fill Gaps Caused by Over-Sea Departures.

HALF MILLION CALL LATER

Secretary Baker Says Date for Beginning of Second Conscription Not Ready to Be Announced. Legislation Awaited.

WASHINGTON, Feb. 20.—Secretary Baker authorized the statement today that no date had been selected for the beginning of the second draft.

The government's disposition not to disturb the labor situation, particularly on farms at the planting season, is one of the factors entering into the situation.

The Provost Marshal-General's office, it is understood, is disinclined to go ahead with the second draft until Congress has perfected the law by pending amendments to change the basis of apportionment and to authorize the President to call into the military service men skilled in industry and agriculture, regardless of previous classification.

The remaining increments of the first draft will begin to move forward to the camps beginning this week.

It is probable that next month local boards may be asked to forward small increments necessary to replace men going overseas, but the second summons of half a million will be later.

Plans for the second draft include calling 100,000 men a month until the second quota is reached. In that way officials expect to avoid much of the confusion which accompanied the first call.

It has been definitely settled that the first contingents will be used to fill vacancies in National Guard divisions caused by the withdrawal of men for the organization of special and technical units.

Deferred draft classification for railroad employees is under consideration between the War Department and the Railroad Administration, it became known today.

The War Department objects to giving special consideration to railway employees as a class, insisting that the case of each man should be considered individually as to whether he is indispensable.

This policy does not satisfy the Railroad Administration, which contends that few railroad men are actually indispensable and that unless some uniform action is prescribed, local exemption boards may be inclined to refuse deferred classification to thousands of necessary employees who have no dependents.

Nearly 500,000 railroad men are within the draft age. But the actual number which would be affected by such a ruling is estimated at less than 200,000.

ALBANY ELKS CELEBRATE

Triple Anniversary Observance is Planned for Tonight.

ALBANY, N. Y., Feb. 20.—(Special.)—A triple anniversary will be celebrated by the Albany Lodge of Elks tomorrow evening. It is in honor of the 50th anniversary of the organization of the order, the 21st anniversary of the organization of the Albany lodge, and the ninth anniversary of the dedication of the Elks Temple here, which was dedicated February 18, 1909.

"No Medicine in 4 Years"—Internal Baths

Mr. A. Czarnicki writes Dr. Chas. A. Tyrrell of New York as follows: "I must admit that the use of the 'J. R. L. Cascade' has cured my chronic constipation from which I suffered since May 12, 1912. I have never even tasted any kind of patent medicine or purgative. My health is excellent in every respect."

Over half a million bright, keen, intelligent Americans have found that internal bathing is more essential to their health than external baths.

Have you found that used internally at night they feel like different people the next morning. No more of that bilious, tired, nervous feeling, but having Nature's own cleanser—antiseptic warm water—removes all the poisons which from the lower intestine, they awake thoroughly refreshed by normal sleep with all their functions acting properly, clear headed, happy and confident, eager and capable for the duties of the day.

Why not learn more about this rapidly growing and natural practice? The "J. R. L. Cascade" is produced by Chas. A. Tyrrell, M. D., of New York, who is a specialist on internal baths, and it is now being shown and explained by Woodard, Clarke & Co., Portland, Ore., who will give you a free on request an interesting booklet on the subject called "Why Man of Today is Only 50% Efficient"—Adv.

anniversary of the organization of the order, the 21st anniversary of the organization of the Albany lodge, and the ninth anniversary of the dedication of the Elks Temple here, which was dedicated February 18, 1909. The fact that these three anniversaries come so near together will be made the occasion for a big meeting.

P. H. D'Arcy, of Salem, a past district deputy grand exalted ruler, who introduced the resolution in the grand lodge at Boston last July which provided for the celebration of the 50th anniversary of the order, will deliver the principal address of the evening.

Governor Withycombe will deliver a patriotic address.

WASHINGTON, Feb. 20.—(Special.)—The Charles K. Spaulding sawmill has enough Government orders for shipbuilding and bridgebuilding materials on hand to keep the mill running full handed with day and night shifts, but it is impossible to get millhands.

The big wages paid by the shipbuilding plants in Portland is said to be partly the cause for this shortage of help.

—You couldn't find anything neater or fresher to wear at home than these very attractive Mary Elizabeth dresses.

—Some are of galatea, in navy green or Copenhagen colored stripes and others are in fresh colored plaids.

—All are made to open all the way down the front, which simplifies their laundering, and all have dainty white belts and collars. Exceptionally good and attractive at \$1.98. Fourth Floor—Lipman, Wolfe & Co.

BILL NEARLY READY

Agreement Reached on War Finance Measure.

NEW CORPORATION IS PLANNED

Special Body to Be Created to Aid in Financing War and Contributory Industries—Committee May Report Today.

WASHINGTON, Feb. 20.—An agreement for revision of the two most important provisions of the bill for a war finance corporation to aid in the financing of war and contributory industries was reached late today by Secretary McAdoo and the Senate finance committee.

Under the compromise, which is expected to secure unanimous committee support for the measure, the powers for licensing of security issues of \$100,000 and over would be vested, instead of in the directors of the proposed corporation, in a "capital issues committee" composed of the members of the Federal Reserve Board and three representatives of private financial interests.

This provision would in effect give the present unofficial and voluntary capital issues committee now co-operating with the Treasury Department, legal authority to control large financing.

Another important change would limit authority of the corporation's directors to make advances of Government funds directly to private industries "in exceptional cases." The provision is essential and expected.

During the last few months, Mr. Baker said, a responsive channel of communication with the allies has been opened, and the latest types of foreign machines have been adapted to American manufacture, the industry increased at least twenty-fold, the training plane problem solved, and the production of battle planes began.

American battle planes were not due in France under the original schedule until July.

MILLHANDS ARE SCARCE. NEWBERG, Ore., Feb. 20.—(Special.)—The Charles K. Spaulding sawmill has enough Government orders for shipbuilding and bridgebuilding materials on hand to keep the mill running full handed with day and night shifts, but it is impossible to get millhands.

The big wages paid by the shipbuilding plants in Portland is said to be partly the cause for this shortage of help.

THE ROUTE OF YOUR WANT AD

Few persons realize the number of hands through which a want ad must pass after it is brought in or telephoned to The Oregonian office.

- 1—The telephone or counter clerk receives the ad; 2—Checker goes over the ad to correct any errors in spelling or classification; 3—Copy boy carries it to composing room; 4—Foreman of classified sorts by classifications and distributes to linotype operators; 5—Linotype operator sets ad into type; 6—Printed proof of ad goes to proofreader to be read for typographical errors; 7—If any errors, ad goes back to machine for correction; 8—Goes back to proofreader; 9—When "OK" goes to make-up man for distribution into form under proper classification; 10—Page, when made up, goes to stereotypers, who cast it into solid plate; 11—To pressroom, where papers are run; 12—To carriers, newsboys, newsdealers and mail, for distribution.

If YOUR ad for The Sunday Oregonian is received LATE Saturday evening you are making it very difficult for every one of these workmen to give perfect service by forcing them to work under a heavy strain and at high tension, for besides your ad there will be hundreds of others received at the last minute.

Why not bring in or telephone your ad EARLY next Saturday? Or, better still, send it in on Friday.

USE YOUR PHONE! AND USE IT EARLY!! Bell, Main 7070 Home, A 6095 Ask for "Want Ads"
