The paramount issues that will come before the next Legislature will be measures that will particularly relate to the war and war activities. The question of how through legislation to accomplish the best results, economically and efficiently, will occupy the attention of every legislator. In times like these, legislation of a radical nature, requiring the expenditure of large sums of money, should not be considered because the whole thought of our citizenship is concentrated upon the defense of our lives and thought of our citizenship is content trated upon the defense of our lives and liberties. Urgent measures of legisla-tion are entitled to and should receive earnest consideration. Legislation that will develop the output of our induses and stimulate the production of

Speaking about "Administration candidates" for the United States Senator-ship, there is a persistent rumor in circulation that Portland's Postmaster, Prank S. Myers, will become a candidate. It is said ever since his return from Washington a few days ago, Mr. Myers has been calling some of the Democratic brethren into his office and permecratic pretires into his order and feeling them out as to his possible can-didacy. Entrance of Myers into the contest for the Democratic nomination, it is believed, would hasten a decision by ex-Governor West as to whether or mot he will run for the office. With Will R.
