for their personal ends with the Republican party, or a faction thereof. the German people after the Hoheny or may not have had in that Presdient Wilson had never hesitated to proclaim himself a Democrat, to practice parself a Democrat, to practice par-tisanship, and to assume the job of tower in number. Readers and ad-"leader," with resultant benefit to the vertisers are patrofizing them less party as a whole. Or it may merely and less. The statement seems signifi-We do not know. office it to say that the Jackson Club had somehow seen the light.

A distinguished visitor to Portland the other day was the chairman of Republican National Committee, pelitical errand, but he made patriotic speeches. The two things are wholly consistent. Support of the war, publicly proclaimed, by the official head of the Republican party was a proper and worthy service to his country. Hays struck the keynote of posaid that the United States is a Nation governed by and through political parties; and that there is not too plains that the country, or state, or city is illy governed, but says he is not interested in politics, or in party, is chiefly to blame. Yet there are many such, every one of whom is all the time "riding on another's ticket." It is bogus citizenship.

The non-partisan is the self-righteous citizen who believes politics is corrupt, that parties are necessarily are frequently wrong and deserve rewhen he differs with it in principle, announced that Germans "should read or when he knows, or even fairly subit because it is fighting undismayed over-refinement of manufacture in pects, that its leaders are mercenary, or its candidates unfit. But what if These "sacred rights" are obviously caused great waste of labor, material persistent practice of non-partisan-ship? What then? Enormous confusion in public affairs and resultant demoralization of Government and its a stage beyond that of debate.

No man may go his own way po litically and achieve success for h self or his followers. Auron Burr tried it and failed; Millard Fillmore tried it and failed; Theodore Roosevelt tried it and failed. It cannot be done; or it may be more nearly accu-rate to say that it has not been done.

There are two great currents of political thought in America, and they are represented by two political parties. It has been so from the begin There are citizens who will identify themselves with neither who will not stay long with either their own infallible judgment and impercable virtue. They cannot agree with the great body of their fellow men as to the prime issue of the day or the prime duty of the hour. They form a little party of their own. It remains a little party

It must be said that both the Republican party and the Democratic sarty of Oregon have wandered far from the original and fundamental principle of party organization in the United States. There are a Republican party here and a Democratic party, because there are National parties; but in Oregon neither is in any true sense a unit of the National organization. There is no recognized party faith, or formulating and defining the party policies. No one may speak for either the Democratic or Republican party in Oregon. There is no way for it to speak for itself. It has form and, perhaps, substance, but no voice. It is an anomaly which time and further experience will correct. After a while it will be seen that party ought not to be the mere personal asset of the candidate.

> CZAR OF AMERICAN INDUSTRY. By appointing Bernard M. Baruch

President Wilson has already exercised the authority which would be given to him by the Overman bill. At the same time he has created under another title the Director of Munitions proposed by one of the Chamberlain bills. He had already made changes in the War Department which have much the same effect as would have been produced by establishing a War Cabinet, as proposed by the other Chamberlain bill. By calling into conference with him at frequent intervals the men in charge of railroads, hairman of the War Industries Board on June 20: conference with him at frequent intervals the men in charge of railroads, food, fuel, war industries, the War and Navy Departments, he has gone still farther in that direction. He has gone ahead to reorganize the Government for war without awalting action by Congress. He has thereby justified all the criticisms which have been tivities of the Signal Corps in the made on war activities.

well shut up shop. Mr. Baruch will absolutely unnecessary refinements. exercise all the purchasing powers of This has been done in face of "over contracts will be arranged by him as and vical reason why work should not regards quantity and price, and will be have been prosecuted with vigor in signed by the respective department carrying out the announced proheads as a matter of course. He will gramme of building these Liberty also direct their execution, Each demotors by the tens of thousands." HOW WOMEN ACT UNDER SHELL FIRE, TOLD IN

The SUNDAY OREGONIAN

Down upon the little farm in France hurtled the huge Prussian shell, roaring like a train on a trestle. It struck, burst in flame and fragments and scattered destruction broadcast. A few moments later an old woman hobbled from the battered hut and busied herself with bandaging the family cow. "Nothing but a wound from shell fire," she told the American ambulancier who paused to sympathize. High and low, born to palace or hovel, the women who face the terrors of war are alike brave, declares W. B.

Seabrook, citing many instances, in The Sunday Oregonian. JUST A PAGE OF PICTURES-But the guns were coughing death where they were taken, these pictorial bits of history from the great war. They have a full page in the Sunday issue, and several show the American troops in camp and trench and on their way to the firing line. "America's stone wall" is a remarkable photograph of men who have gone to Picardy.

MAKING US STAND ON OUR OWN FEET-Less than in any other country, the mailed hand of war crushed commerce in America. But American industries rallied, caught up new devices and carried on as boldly and resourcefully as the boys in olive drab. Read the interview with William Cox Redfield, Secretary of Commerce, in the Sunday paper. Shoes from shark-leather, beef roasts from Pacific Coast whales-and a hundred instances where ingenuity opened our eyes to unguessed resources.

UNCLE SAM'S WOODEN FLEET-Of more than passing interest to Portland, where many wooden ships are being built for the wartime merchant fleet, will be Frank G. Carpenter's article in tomorrow's issue of the scores of great yards where 100,000 workmen are building and launching the staunch wooden hulls of vic-Each Carpenter industrial story cleaves straight to the fundamentals and is told so entertainingly that the reading thereof

is as pleasant as it is profitable. CAN WOMEN SWITCH TRAINS?-They were wont to switch them, to the scandal of bacteriologists, in ballrooms and along the streets. But the task today differs vastly, for the trains they have undertaken to switch are the bumping, jolting, grumbling strings of cars that carry America's commerce. They are "making good," asserts

Clive Marshall, in a special Sunday story. PERSHING SENDS A CHEERING MESSAGE-In fine fighting fettle are the American troops in France, clean physically and spiritually, ready to go forth as so many Gideons against the Hun. Of course General Pershing didn't say it exactly that way, but such was the drift of his statement to Edward Marshall, correspondent with the American Expeditionary Forces. "Fathers and mothers at home need not worry, as their sons are clean and every possible moral influence will be brought to bear to keep them so," declares "Black Jack" Pershing. His is a message that all who have sent a

lad across should read TWO SPECIAL FEATURES THAT WIN-In the special features section of the Sunday issue sails the renowned "Houseboat on the Styx," creation of John Kendrick Bangs, on a new and novel cruise. The immortals discuss the liberty loan tomorrow. W. E. Hill's page of crayon drawings, depictions of everyday folk as we know them, ranks among the finest work of this distinguished artist and illustrator. Tomorrow he sketches the story of "The Home Guard."

> A Nickel and a Nod Buy the Best, THE SUNDAY OREGONIAN.
