The German balance sheet, reckoned on the same basis as the British, would, with the interest on the sinking fund pensions and pre-war expenditure, be f120,000,000, it would make their total additional revenue f155,000,000. Tenton Taxes Favor Rich.

Teuton Taxes Favor Rich. The German taxes had been almost exclusively indirect, imposed on com-modities required by the masses of the people and not upon the wealthier classes, who control the government and upon whom the government is afraid to put extra taxation. Mr. Bonar Law declared it was the duty of the government to levy as much taxation as could be borne by the na-tion without weakening it in the con-duct of the war. The excess profils tax would not be

duct of the war. The excess profits tax would not be increased, because if it were the gov-ernment should not get more money and might get less. He intended, howand might get less. He mitended, now-ever, to stop the leakage in that tax. Mr. Bonar Law introduced new taxa-tion schemes with the proposal to in-crease the postal rate within the United Kingdom and to the United States, Canada, India and the other do-

States, Canada, India and the other do-minions from a penny to three half-pence, yielding 13,400,000. The postage on postcards would be a penny. The income tax would be raised from 5 shillings to 6 shillings in the pound. The stamp duty on checks would be raised from a penny to two-pence, yielding 1750,000.

Income Taxes to Increase. The increased income tax would yield fil,000,000. There would be no change in the tax on incomes under 5500. There would be no increase in £500.
