Names on Service Flag.

COVE, Or., April 30 .- (To the Edia tor.)-It is suggested that the name and branch of service of each soldier, sailor and fiver be printed with indeli-ble ink on a hit of white linen cloth and sewed with red stitches, within his blue star on the service flag, thus:
"C. R. Kelley, 5 F. A. Bat. F." Any
job printer who puts up butter wrappers uses a blue ink which withstands
ill effects from hot, cold, fresh and

t water and weather conditions edless to say no other colors than he National red, white and blue should he used. Whenever one loses his lift in the service, let the word "hero" be worked in blue thread under the name line. I think many more reasons can be given in favor of this suggestion than against it. N. R. Farm Work Soon After Noon. CRABTREE, Or., April 30 .- (To the Editor.)-Some officials are asking that our school year be shortened, as if begrudging to the growing Amer-ican mind the insufficient training it now receives. The Oregon School Superintendent asks that all persons possible be kept in schools and col-leges. "Efficiency" is the watchword Our government is now calling, call-ing and almost in vain for well-trained and educated men and wmen. In the face of an awful shortage, is it possible that there are persons who wish to strat a retrace of the heart-sicken-

ing journey up from the caveman?
Carry the idea to its logical conclusion and we would soon be among the early-day Indians; and what could they accomplish against the Kaiser with all his well trained, well educated officers and their men. It will take efficiency to put the Hun back of the Rhine. It is more of a combat of brain and skill

than of brute force.

That word "efficiency" is the pivotal point and it is attained only by con-centration of mind and educational training. Those equipping long lines that bear on our war efficiency should be kept in school during the entire year until the close of war. Members of Crabtree High, in student body with their own officers, took up the matter and handled it effectively. They voted to meet at 7:30 A. M. in continuous session, dismissing at 1 P. M. Some live five miles in the country. The principal, who lives in Lebanon, 16 miles distant, coming and going on train morning and evening, expressed doubt as to students being on time. Where to Get Training. PORTLAND, May 1.—(To the Editor.)—Some time ago I noticed in an article in The Oregonian, that the American Press Association was con-sidering opening up a telegraph school for Class A-1 men who had had previous telegraph experience; also in another article that the Benson School would give instructions in wireless. I have had telegraph experience and
