We will put a stop to tyranny and rid the world of poverty. We are khaki boys for liberty. Make way for the U. S. swatters—Clear the seas for the U. OREGON BOY WRITES

Lieutenant David H. Backus Tells of Work in France.

BIG GUNS WORK WITNESSED

American in Air Service in Paris During One Bombardment—Preparation for Front-Line Duty Is Well Under Way.

From Lieutenant David H. Backus, with the United States Air Service in France, comes a letter telling of his being in Paris and seeing the effects of the big gun which has been hammering at Paris for a month. The letter was written to Corporal Romayne L. Backus, with the 402d Squadron, A. S. C., at Vancouver Barracks.

Quotations from the letter follow: "No, I had not flown until yesterday, since February 13. We sat around where we were for a long time, but about a week ago we were ordered down here and I am down to earth to get back here and be able to finish my chase training again. By the way, at one place where there were 3000 Canadians, formerly soldiers, getting out big timber for the trenches, and also three companies of American foresters doing the same thing. This place has changed since I left. They have a lot of outlying field barracks and I am at one of them now. Will finish up cross-country here and then to another field for 10 days, for formation flying, then to another field for a week or so for combat work, then down south of Bordeaux to a French aerial school. Then we go to the front in a Chase Squadron—Pursuit, I guess you call it. They are fast, open cockpit fighting planes. About the best speed these training planes do is 120 miles an hour.

"I was in Paris and saw the work of the mystery gun during one day. It greeted us just after we got in a taxi at 7 A. M. We had gone about three blocks from the station when we saw the Louvre when, bang! we saw a cloud of smoke about two blocks away. At one place where other day we saw 12 planes go over. They were on reconnaissance and photograph expedition."
