

MOUNTAIN SIDE TO TACOMA'S SIDE

Statements Made to Prove Mountain Should Not Be Called Rainier.

SICADE NARRATES LEGEND

S. W. Wall in Address Appeals for Justice for His City and A. H. Denman Contributes Photographic Views.

Mazamas of Portland assembled last night at Library Hall, heard the Tacoma argument for the calling of Mount Tacoma or Mount Rainier, by the former appellation, which was given it in legendary days by the redmen.

Appearing for the Chamber of Commerce, of Tacoma, in behalf of the name Mount Tacoma, were Henry Sicade, an educated Indian of the Nisqually tribe, S. W. Wall, a Tacoma newspaper man, and A. H. Denman, a photographer of that city, who illustrated the talks with views of the mountain.

Rivalry between Tacoma and Seattle under the name has long been rife, the latter city maintaining that it should be Mount Rainier, as it is commonly designated on the map—a contention which was recently supported by the National Geographic Society, on the ground that more than a century of use had established it.

Indian Name Advocated. Tacoma, on the contrary, asserts that the peak should be known by the name of the Indians, used by former Captain George Vancouver, the British explorer, in 1793 christened it as Mount Rainier.

In discussing the Indian origin of the name Tacoma, as given the peak, Mr. Sicade dwelt interestingly upon the legends of the Indians, and the instances of the dim and distant christening of tribes, and of places, rivers, lakes and mountain ranges.

Of the origin of the name Tacoma, as applied to the peak, Mr. Sicade related several legends, handed down through the generations and obtained by him from venerable members of the tribes.

Indian Legend Related. "There is on the western slope of Mount Tacoma," said Mr. Sicade, "a little valley, rich in nature's gifts of berries, game and fish. This place was the real Tacwuk, inhabited by a small band of natives, called Tacwuk, meaning people of that vicinity.

"There lived and grew up a beautiful young woman before the mountain existed. This young woman was betrothed to a brave of the Olympic Peninsula, who already had a wife. The young man, however, was in love with another wife, and their rivalry grew bitter. At last the young woman scratched the face of her rival. The brave interceded, and he, too, got scratched.

"The young woman prepared to leave for good, taking her son along, and also a large quantity of dried fish. When about ready to pull away in their canoe, the young mother exclaimed to the boy: 'Tacoma!' meaning 'Don't forget to take the snow water along! From that exclamation his was called Tacoma."

Wall Turned Into Mountain. Later the wife returned in repentance, but the husband, called the "Changer," sought her out and she was transformed to the mountain, with her son appearing as the hump on the southwest corner of the peak.

"The brave, for his share in the infidelity, was changed to part of the Olympic range, and fissures in the rock still point to the grandeur of the tribes as the finger furrows of the furious wife.

"In coming here, I feel that I have broken faith with my people, who once dominated the Western Hemisphere," said Mr. Sicade, in conclusion. "All is now yours, and you, disputable name! But must I keep in mind that my adopted city, which has taken an aboriginal name, has honored me by asking me to appear before you to do my humble part for them."

"I want to thank you, you, American people, for your goodly perpetuated aboriginal names. I shall not worry nor question your good judgment for justice—it left to your decision."

At the conclusion of his address, the audience tendered a rising vote of thanks to Mr. Sicade.

Wall Appeals for Justice. Mr. Wall, who has led the fight for the naming of the peak as Tacoma, and who has been indefatigable in the collection of evidence and the presentation of the case before geographical authorities, reviewed the argument for the Indian term, and appealed for justice.

The Mazamas were recently requested by New York geographers and mountaineers to investigate the merits of the rival claims. It is probable that the Seattle argument for Mount Rainier will be presented in the near future.

Custom-House officials have an unusual case to handle in the case of auxiliary schooner, Margaret, of the license of which expires today, for since reaching port her twin engines have been out of commission. The vessel is to be towed to Vancouver, B. C., for the installation of new engines, and that of a schooner. After her operation she will proceed to Seattle for inspection as an auxiliary schooner, so the license she is to surrender today will probably be forwarded to Seattle to be indorsed for another year and reissued when she changes her classification.
