### GOOD HOMES NEED

Use of Warehouses and Loft Buildings Held Poor Policy.

### EXPERT EXPRESSES VIEWS

Labor, to Be Most Efficient, Should Be Given Every Advantage of Life Under Best Conditions, Says Town-Planning Adviser.

Thomas Adams, town-planning adviser to the Canadian government, regards the use of warehouse and loft buildings for housing workers as being on a par with the use of obsolete machinery in an industrial plant. Labor, as the most important material that enters into production of ships, machinery, munitions and all essentials for war, should be as efficient as possible, given every advantage of living under the best conditions, in order to attract and permanently retain the highest type of skilled men and women, was the conclusion of his British authority in his address before representatives of the civic clubs of Portland at the Chamber of Commerce yesterday.

E. G. Crawford, vice-president of the United States National Bank, was chairman of the meeting, which was a session of the commonwealth conference. Quoting from the records of the city building inspector Mr. Crawford presented information as to the present situation in Portland, and that there is a surplus of 1000 houses in February none are vacant today.

Mayor Baker, in a brief address welcomed Mr. Adams to Portland as a visitor whom it was a special privilege to have because he could advise Portland on a matter in which the people are vitally interested.

### BROKEN GLASS IS TABOO

Ordinance Under Preparation to Require Places to Be Gathered.
