

DRAFT BOARDS TO JUDGE INDUSTRIES

District Bodies Authorized to Use Discretion in Deciding Matter of Preference.

ADVISERS WILL ASSIST

Length of Service of Employees Will Be Taken Into Consideration in Order to Defeat Any Attempt to Dodge Conscription.

WASHINGTON, Sept. 9.—The new priorities classification of industry announced yesterday by the War Industries Board will not bind district draft boards in determining deferred classification on occupational grounds of men between the ages of 18 and 45 who are to register Thursday.

The boards may determine that other industries are necessary, but in granting deferred classifications they must satisfy themselves that the industry is necessary and that the individual registrant is essential to the industry.

This was disclosed by General Crowder's plans for occupational exemptions in classifying new registrants.

The new draft regulations provide for an advisory committee of three to each district board, one to be named by the Department of Labor, one by the Department of Agriculture and the third by the board itself.

Much Leeway Allowed.

The new regulation says:

"Such lists shall not be regarded as binding upon the district board in its conclusions as to whether or not any particular industry, occupation, or employment, including agriculture, is a necessary industry, occupation, or employment within the meaning of the law and regulations, nor shall such lists prevent the district board from holding as necessary any industry, occupation or employment including agriculture, not contained therein."

"Such preference lists and other facts and information in the possession of such advisers will supplement the information in possession of the district boards, and will also be used to assist the district boards in dealing with specific cases."

Detailing the method boards are to follow, the regulations say a registrant shall be considered entitled to exemption only when "completely engaged" in an occupation, profession, business, essential; when his removal would result in substantial damage to the enterprise and when "the available supply of persons competent to do the work is such that the registrant cannot be replaced without direct, substantial, material loss and detriment to the effective operation of the enterprise."

Length of Service Counts.

Further restricting the granting of deferred classifications on industrial grounds, the regulations notify boards that they should consider among other things the length of time a registrant has been in employment and become convinced before granting his claim that he is "not now so engaged for the primary purpose of avoiding military service."

The regulations fix the place of a necessary worker in a necessary occupation in Class 2, the place of an expert or assistant manager or division head in Class 3, and the place of a sole manager or director in Class 4.

The advisory committees to the draft boards are empowered to certify deferred classifications for registrants who are entitled to it, but who for patriotic reasons may object to making the claim for themselves. General Crowder has insisted registrants make the classification should make the claim when filling out their questionnaires as a patriotic duty to prevent unnecessary work by the draft boards.

YOUTHS TO TRAIN

New College Corps Explained by President Campbell.

ARMY COMMISSIONS OPEN

Preparation to Pave Way to Offices. Generous Treatment Is Given by Government, Says Educator, Back From Capital.

Mobilization of the Nation's schoolboys for training that will fit many of them for shoulderbars and specialized service in the American Army is the fundamental purpose of the students' Army training corps, authorized by the War Department in more than 400 colleges and universities, according to P. L. Campbell, president of the University of Oregon, who returned last night from Washington, D. C.

Not only are the high school graduates of last year urged to enroll for immediate enrollment in the military course provided by the various colleges, relates President Campbell, but all high schools will be asked to do so to condense their courses for senior students of the present term may complete their work by January and enroll for the military college course.

President Campbell went East in July, where he first attended the convention of the National Education Association, having charge of the department of higher education. At the conclusion of the assembly he proceeded from Pittsburgh to Washington, where he has since remained as secretary and treasurer of the American Council on Education, an organization of national scope which has worked with the War Department in the organization of the students' Army training course for all states.

Opportunity Offered Young Men.

"The purpose of the council was to mobilize the educational resources of our colleges and universities to the fullest extent for war purposes," said President Campbell last night. "There is nothing sentimental about the step, which is dictated by urgent need for specially trained material for commissions and technical work."

"The Students' Army Training Corps offers a remarkable opportunity to young men. Subject to call in any case, the privilege is that of receiving special training which will qualify them for officers' commissions, for technicians, for medical work—for any service for which they show special qualifications."

"The work has very important aspects, both for the present and post-war periods. While the primary object is to supply trained men for officer material and technicians, it is also the object of the Government to keep intact the educational programme of the country during the war, not permitting it to break down under war stress, as have those of France and England."

Way Opened to Officers' Camps.

"The advantages to many of the students will become apparent when it is realized that 50,000 additional officers will be needed for service by next June. A large number of the boys enrolled in the Students' Army Training Corps will have the opportunity to attend officers' training camps. This is a big, generous policy that the War Department is offering. Its importance cannot be overestimated. The boys are paid from the date of their enlistment, and they are supplied with uniform, rooms, subsistence and tuition."

Those who are now enrolling will be tested by January, to determine their fitness for certain work. The boys who are selected for courses at officers' training camps may leave in January, while those selected for technicians or medical work will continue their special studies along those lines in higher courses."

Dr. Campbell talked interestingly of the varied projects of the American Council on Education, comprising the work of a committee on international relationships, which is designed to perfect mutual understandings and standardized courses that will permit the passage of students from one country to the other, taking full advantage of the educational facilities provided by both.

French Girls Get Scholarships.

Another phase of work was the securing of scholarships in American colleges and universities for French girls. Already 227 scholarships have been offered by various schools, averaging \$500 per scholarship, and 100 young women of France are now on their way to take the courses so generously offered.

BOISE MAN DJES IN ACTION

News of Death of Lieutenant Regan in France Shocks Friends.

BOISE, Idaho, Sept. 9.—(Special.)—Boise was shocked to learn today of the death in action of Lieutenant John M. Regan, son of Mr. and Mrs. T. Regan, prominent residents of this city. A letter from a friend in France, taken at the tidings. He died August 10. No official confirmation has been received from the Government. Lieutenant Regan was a member of Company V, Boise.

Mrs. J. F. Coonan, Boise Barracks, also learned of the death of her brother, Captain Phil J. Keiser, while in action in France, July 12. He was a former resident of North Bend, Or., and was with the Thirtieth Engineers. A sister, Mrs. Harry Wendoroth, resides at Salem.

COLONEL SICKLES SUICIDE

Retired Army Officer Shoots Himself at St. Louis Home.

ST. LOUIS, Sept. 9.—Colonel Horatio Gates Sickles, U. S. A., retired, shot and killed himself in his home here today. He was 64 years old and formerly was in charge of the 12th Cavalry.

Worry over his own and his wife's health is said to have been the cause of his taking his life. He retired from the Army seven months ago. He was admitted to West Point from Pennsylvania.

Mosesohn Farewell Announced.

A farewell reception will be tendered Dr. and Mrs. N. Mosesohn tonight, 8:30 o'clock, at B'nai B'rith Hall, with a fine programme as one of the features of the evening. Dr. and Mrs. Mosesohn will leave tomorrow night for New York City, where they will make their home with their son, M. Mosesohn. Dr. Mosesohn has been editor of the Jewish Tribune in this city, secretary of the Jewish Relief Society and prominent in many phases of social service work.

Delegates to Tax Meeting Named.

SALEM, Or., Sept. 9.—(Special.)—As delegates to attend a National tax conference in St. Louis, beginning November 11, Governor Withycombe today named the following Oregonians: Charles V. Galloway, State Tax Commissioner; Dr. J. H. Gilbert, University of Oregon; C. L. Starr, tax expert, Portland; Professor J. A. Bexell, Oregon Agricultural College, and Robert H. Strong, of Portland.

B. A. Anderson Stays in Jail.

B. A. Anderson, arrested Sunday night on a charge of drunkenness and held for the Federal authorities because the police found 150 pounds of sugar in his house, was sentenced to pay a fine of \$25 and serve seven days in jail by Municipal Judge Rossman yesterday. Anderson said he had the sugar for making preserves. He will be turned over to the Federal authorities after he has served his sentence in the City Jail.

WAR COURSES PREPARED

O. A. C. OFFERS VOCATIONAL SUBJECTS.

Horseanship, Tractor Handling, Engineering, Pharmacy, Mathematics and Physics Included.

OREGON AGRICULTURAL COLLEGE

Corvallis, Sept. 9.—(Special.)—Announcement of many special war courses which the Oregon Agricultural College is prepared to offer members of the O. A. C. was made today.

Horseanship will be taught in the school of agriculture to train for the artillery and cavalry. A tractor work is expected to be of value to prospective tractor or tank operators. Several courses will fit students as inspectors in the Quartermaster's Corps. Regular work in agriculture will be offered for those not of draft age or physically unfit and to seniors.

The school of pharmacy is prepared to give training in the Hospital Corps of the Army and Navy, and work in preparation for entrance into the Sanitary Corps.

Work will be offered in mechanical, electrical, civil, experimental, chemical and mining engineering. In electrical engineering courses will be given which will be of value in signal and radio communication. Courses will be given in mechanical and experimental engineering in gas engines, which will be basic for men who wish to enter the aviation service. Work will be given in mathematics and physics, which are essential to those entering field artillery work. Logging engineering is emphasized as an important field for war work.

TARGET RANGE FINE ONE

Federal Court Fixes Prices for Land to Be Bought at Probstel.

VANCOUVER, Wash., Sept. 9.—(Special.)—The United States Government soon will have possession of a target range at Probstel. The Federal Court has awarded R. A. Powers, \$100,000 in lieu of the \$4000 he asked, for his tract of land necessary to complete the range.

The range is said to be an exceptionally fine one and has hills and mountains back of it so that artillery could fire in that direction and not destroy life or property. The Government has had a lease on the ground for years. An attempt was made before the war to buy it, and money was appropriated, but before the act was put through Congress an option expired and the owner at once raised the price.

Logger Drowned in Humptulips.

ABERDEEN, Wash., Sept. 9.—(Special.)—William Miller, a logger at the General Packing Company's camp on the Humptulips River, was drowned Saturday, falling from a boom. The body was recovered and brought here later.

New Facts About Teeth

Which Supplant All Former Theories

All Statements Approved by High Dental Authorities

Tooth Troubles Are Caused by a Film

Now it is known that a film on teeth causes nearly all tooth troubles. That discovery has upset all old teeth-cleaning theories.

Today every authority knows that cleaning teeth means more than brushing off debris. Tooth preservation calls for something to constantly combat that film.

That slimy film which you feel with your tongue is the great tooth destroyer. That is what discolors—not your teeth. It hardens into tartar. It holds food which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Also of many internal troubles. The dental name for this film is bacterial plaque.

It gets into crevices, hardens and stays and resists the tooth brush. It makes the teeth unclean—unsafe—however well you brush them. Film-covered teeth are bound to discolor. They constantly breed germs. And pyorrhea, it is said, afflicts nine folks in ten.

Film is the source of these troubles. And the chief object of teeth cleaning is its removal. Unless you combat it day by day it will fix itself and stay.

These facts are now recognized by every authority. Dentists long have known why brushing fails to save the teeth. And science long has sought a way to fight this dangerous film.

Science now has found a way. Today it is embodied in a dentifrice called Pepsodent. It has proved itself to able authorities by four years of clinical tests. Now it seems clear that this invention will revolutionize teeth cleaning.

Anyone can quickly prove this. So we now supply a One-Week tube and urge everyone to try it.

Your Brushing Fails to Remove It

The ordinary dentifrice is not sufficiently effective in removing the film. Any soapy dentifrice is alkaline and tends to make the film more resistant to the brush.

That is why old methods have proved ineffective. Teeth have still discolored, still decayed. Statistics show that tooth troubles have constantly increased, despite the wide use of the tooth brush.

The time has come to discard inefficient methods and apply a film remover. Let one week show what Pepsodent can do.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object is to dissolve the film, then to constantly prevent its formation.

Pepsin alone won't do. It must be activated, and the usual activator is an acid, harmful to the teeth. But now a harmless activating method has been found. Five governments have already granted patents. So pepsin now can be efficiently applied.

Pepsodent embodies this new method. Years of clinical tests in thousands of cases have placed its efficiency beyond any question. Today its use is advocated by dentists everywhere. You will see the reason clearly when you make a one-week test.

Present this coupon to any dealer listed below for a One-Week tube. Use it like any tooth paste and watch the results. Note how clean your teeth feel after using. Mark the absence of the film. See how your teeth whiten as the fixed film disappears.

Then you will know what clean teeth really mean. You will know that film can be combated. And never again will you return, we believe, to the old teeth-cleaning methods.

This is most important to you. That film is your teeth's great enemy. Learn how to end it. Cut out the coupon now.

DRY ZONES VOTED

Senate Resolution Promptly Adopted by House.

WILSON TO HAVE POWER

Italian Government Protests Against Provision in Prohibition Bill Barring Importation of Wines in Wartime.

WASHINGTON, Sept. 9.—Without a dissenting vote the House today passed, after a few minutes' consideration, the Senate resolution empowering the President to establish prohibition zones around munition factories, mines, shipyards and other war production plants.

The resolution was reported by the rules committee with the information that Acting Secretary of War Crowell regarded its passage as urgently important. A brief hearing had been held earlier in the day.

The President is given full power to establish dry zones when he deems necessary, and penalties of \$1000 fine or one year's imprisonment are provided for violation of his regulations.

A protest against the provision in the war time prohibition bill barring the importation of wines, except those in transit after final passage of the measure, has been made by the Italian government through Ambassador Di Celleri. A copy of the protest was transmitted to the Senate foreign relations committee today by Secretary Lansing.

The Italian Ambassador urged that the measure be amended so as to permit the wine makers of his country an opportunity to readjust their business.

Resinol

does wonders for sick skins

A skin that is rough, reddened, blotched or disfigured by eczema, sore spots, or other eruptions, needs attention.

Let Resinol Ointment help you to get rid of these annoying, unsightly affections of the skin.

Resinol Ointment contains medicinal agents that act directly upon the skin, heal its hurts and help it to keep healthy and attractive.

Resinol Soap aids and quickens the action of Resinol Ointment.
