Where the British troops have advanced they have at many times come upon patches of ground where torn bodies of men, broken machine guns, dented equipment, cartridge cases and clips are all mixed up together as though they had passed through some gigantic mangle.

German documents show the enemy is not quite satisfied with himself or with his defenses, and his line is literally honeycombed with deep dugouts. An order issued by a German General expressly forbids troops to occupy dugouts which descend lower than eight steps underground. The General appears to have been much worried on the subject, and goes into great detail in ordering such dugouts closed or otherwise made useless for the troops.
