PRICES TO BE FIXED

Wilson Announces His Intention Regarding Cotton.

AWAITS COMMITTEE REPORT

President Informs Southern Senators He Will Order Government Control and Distribution of Staple.

WASHINGTON, Sept. 20.—President Wilson will fix the price of cotton, placing the last of the principal commodities necessary in the prosecution of the war under Governmental regulation, despite strong pressure from the Southern states.

In addition to determining the price, the Government will take over control of the distribution of this year's crop. The decision of the President, announced at a conference this week with Senators and Representatives from the cotton states, became known today. Plans to carry out the decision are said to be under way.

The principal factor in the action of the President is understood to have been the shortage in the present crop estimated at between 4,000,000 and 5,000,000 bales. The price to be named by the President or the means of controlling distribution have not been decided upon. Before fixing prices was first mentioned, cotton sold at 35 cents a pound. Secretary Houston, it is said, has recommended that 25 cents would be fair. Southern producers deny this would be a fair price and declare that because of the increased cost of production a figure above 30 cents should be named. In determining a plan for controlling cotton distribution it is understood the President is endeavoring to work out a method of co-operation with the British and French governments.
