Actress' Appeal for Liberty Brings \$50,000.

SHIPYARD FORCE RESPONDS

Marie Dressler's Talk at Grant Smith-Porter Plant Gives Yard's Subscription to Fourth Loan Vigorous Boost.

Marie Dressler made \$50,000 Thursday night in a short talk to men of the Grant Smith-Porter Ship Company's plant, as shown by a check completed

Miss Dressler did not enjoy any part as incomplete. of the fund personally, nor will she, as the amount represents a jump in fourth uberty loan bond subscriptions there, which followed her appeal to the workers of the two night shifts to "dig deeper." There was a big rally at noon yesterday and another buige was made in the liberty loan fund bag, with the result that the plant's personnel was said last night to have raised its total from \$600,000 to \$700,000 in 24 hours. And so taken was she with the wel-come of the men and the determination

to double their subscriptions that Miss Dressler announced she would return to the yard to meet the tollers of the day

It is said that the popular actress, standing on a low piatform in the midst of the crowd, distinguishable to all because of the lights, while some of her audience were in shadows, made one of the most unusual pictures seen at the yard. In a dozen ways Miss Dressler showed her pleasure at being responsible for such enthusiasm, and when the men began increasing their subscriptions she and four men in the office were unable to catch all the numbers called from the crowd to double and, at

times treble their initial orders.

From the time the actress entered the plant and was greeted by the band, stationed on the porch of the recreation hall, until she bade her new friends od-bye, there was never a lull in the

HARBOR BUOYS TO BE CHANGED

Better Arrangement for Navigators Is Promised Shortly,

In reporting the re-establishment of Clatsop Spit gas buoy No. 12 Su-perintendent Warrack, of the 17th lighthouse district, announced that ex-tensive changes would be made in the entire line of buoys from Inside the entrance to the river to Fort Stevens, to take place November 1.

Clatsop Spit buoy is to be shifted to the westward and the line of day marks changed from No. 6 buoy to the gas buoy, so vessels will have a straight course on a line that will prevent any difficulties should Clatsop Spit make in that direction. The change will provide for less of an angle at the turn, where No. 12 is located, and the buoys fro out slightly. In addition a temporary bell busy marking the end of the south

CHIEF GAIN IS IN SHEEP

Advance of Serum Treatment Is Held Responsible for Recent Great Development in Stocker and Feeder Hog Traffic.

Receipts of cattle, hogs and sheep at 58 markets during August show increases of 10.8 per cent. 31.2 per cent and 26.6 per cent. 51.2 per cent and 26.6 per cent. 1917. according to the monthly stockyards report issued by the Bureau of Markets. For the first eight months of 1918 the combined totals of the same markets show that the receipts of cattle increased 12.3 per cent. Comparative figures on shipments and local slaughter also show increases for all species in August, 1918, and for the first eight month of 1918, with the exception of the slaughter of sheep, which shows a decrease of 2.2 per cent during the first eight month of the serum and virus treatment for hog cholora is credited by the United States Department of Agriculture officials with being largely responsible for recent great development of the traffic in stocker and feeder hogs. It is estimated that more than 37,300,000 pounds of pork were added to the Nation's supply by this traffic in the fiscal year that ended June 30, although regulations were modified to help the industry only on January 2. Further notable growth of the traffic is expected.

Receipts at the Portland stockyards year that one and trading was of moderate proportions. The demand for beef cattle has failen off to a considerable degree and buyers are bidding about a quarter less for the best offerings. Hogs and sheep hold steady.

Arrivals were 175 cattle, 4 calves, 612 hogs and 124 sheep. Shippers were:

the disposition made of the same. They may at any moment be called upon for this information.

"In determining the cost to the holder of storage butter these items may be taken into consideration: Purchase price, transportation charges (if any), storage charges actually incurred, insurance charges (if any), interest at current rate while goods are in storage and cost of printing from tubs or cubes (if any).

"In the matter of cold-storage charges, if the goods have been in storage for two months one cent may be added for this item, and it cent for each additional month, but in me event can more than two cents be added to original cost as the item of storage. No allowance is made by the Food Administration for any shrinkage that may result in storing or in cutting and printing butter. The holder may average, if he desires, the cost of the different lots of butter stored in any month, but in such event he must average the cost of all lots stored that month. In the event that the holder of stored butter is, at the same time, the manufacturer of the goods, he may determine his first cost by computing the cost of raw materials and expense of manufacture, else consider as his cost reliable market quoiations in some daily commercial price current on the day goods were stored.

"The Food Administration says that cold-storage butter must be seld by the holder at a reasonable profit and at the same time sets certain figures as a maximum that may be taken as a profit. In making sales of butter the holder (these rules apply only to wholesalers and jothers, not to retailers whose profit is limited to 3 cents per pound for service stores over total cost) is absolutely limited to the following profits: Carlots, Ic; less than cars but amounting to 700 pounds or more, 1½c; less than 700 pounds, but amounting to 100 pounds or more, 2½c; less than 700 pounds, but amounting to 700 pounds

HEAVY SELLING RESULTS FROM NEWS FROM BULGARIA. Only Part of Extreme Loss Is Regained.

Government Buying Cheeks

Decline in Oats. CHICAGO, Sept. 27.—Severe breaks in the price of corn resulted today from Bulling garian efforts for an armistice. After settle acks that reached 5 cents a bushel, the market closed nervous, 34.944 c net lower with October \$1.425 and November \$1.405 cord of the first settle from 15c decline to 17c advance.

General selling in the corn market took place from the outset, but it was not until defined by the final half hour that the most scute weakness developed. Doubt as to whether the settlen of the Bulgarian premier in seeking peace had been fully authorized of whether his move was not a trick to gain time for the Bulgarian troops did much to retard the descent of values. At no intime, however, did the market react to any important extent.

Oats sympathized with the weakness of Ker corn. Government and export buying, though, checked the decline.

Higher quotations on hogs gave some Mexical control of the corn.

Buying in the Large Eastern Centers Is More Conservative.

NEW YORK, Sept. 27.—Bradsfreet's tomorrow will say: Government work expands at the expense of non-essential enterprise and goods for ordinary trading tend to become scarcer. Buyers in the prosperous crop-yielding zones are anxious to get down orders. In the big eastern centers, however, where taxes, subscriptions to the liberty down the servative.

Notwithstanding all reservations the flow of business is considerably stronger than the ebb, war work, of course, predominating. Non-essential lines reflect further curtailment, and while buying of heliday gifts has started, the tendency is to eachew luxuries, though here and there new-found wealth has brought about some squandering.

Weekly bank clearings amounted to \$6,151,471,000. More Conservative.
