

PRICES OF BURLAP ARE REGULATED

Maximum Quotations Are Fixed by Government.

BASIS 13.60 AND 16 CENTS

Further Import Purchases Are Prohibited Without Consent of War Industries Board.

With the Government engaged in regulating burlap prices, so it can obtain vast quantities of trench bags it requires at reasonable cost, trading in burlap and grain bag markets has naturally become unsteady. There is no business at all piling in the bag market here. There naturally would not be much doing at this time of year, but a few bags might be sold for home or California account if the market were on a settled basis. The last business done was at 23 1/2 cents, which shows a considerable decline from the quotations prevailing just before harvest.

Maximum selling prices apply until further notice to all sales of burlap cloth in carloads or more. No maximum price has been fixed for single bales or less than car lots, but it is expected that the prices of these will be kept in reasonable proportion to the carload prices after making due allowance for the extra expense of doing business in small lots.

ALL COARSE GRAIN RIDS ARE RAISED

Offers on Local Board Are 25 Cents to \$2 Higher Than on Friday.

The coarse grain market was stronger yesterday in view of the sharp advances in the East. On the Merchants' Exchange, second quality oats bid one cent higher and but one was up 60¢ to \$1.00. Corn offers were raised 1/2¢ and barley 25¢ to 30¢.

The Idaho crop report gives the corn condition as 92 per cent against 90 per cent a year ago; spring wheat yield per acre, 21 bushels against 22 bushels a year ago; quality 93 per cent against 92 per cent; but yield per acre, 49 bushels against 50 bushels; quality 92 per cent against 93 per cent. Barley yield per acre 25 per cent against 29 per cent; quality 90 per cent against 89 per cent. Production of spring wheat 10,200,000 bushels against 8,200,000 a year ago. Oats production 10,200,000 bushels against 13,300,000 bushels. Barley 4,200,000 bushels against 5,000,000 bushels.

The California crop report places the condition at 87 per cent against 90 per cent; production 2,645,000 against 2,400,000 bushels a year ago. Oats quality 90 per cent against 94 per cent; production 5,696,000 against 6,800,000 bushels. Barley quality 88 per cent against 93 per cent; production 2,900,000 against 3,000,000 bushels. Barley quality was undoubtedly lowered by the heavy rains which caught much of it unthreshed and more piled up in fields in patches. Corn crop improved somewhat by rains in September.

The American visible wheat supply statement compares as follows:

APPLE ESTIMATE IS REDUCED

Increased Per Cent of Culls Due to Late Culling. Total Harvest Estimated for October Falls Below Former Estimates because of the increased per cent of culls due to late culling, moth larvae infestation. In some instances the culls have been packed and the apples and batches after packing. Some growers used the artificial spray as late as September 15 with good results. Cold storage will delay the marketing of these late brooding eggs. The Washington State Department of Agriculture estimates the yield as follows:

Wool, Mohair, Etc.

Wool—Oregon, 50¢ to 71¢ per pound. The wool crop was moved at very satisfactory conditions. Clarke Company shipped an output of 12,000,000 pounds of dried wool. The cranberry crop of Grays Harbor and Pacific counties is reported to be the largest in the history of the enterprise. Some grow-

EASTERN MILLS IN NEED OF MOHAIR

Small Lots of Fall Clip Sell on Basis of 75 Cents—Fargo, in Texas.

Odd lots of Fall mohair have sold at Boston during the week at about 75 cents for stock in good condition, while some inferior and heavy has also been sold in a few instances at a comparatively low price. Stocks on hand, however, are small against a fairly good demand, says the Commercial Bulletin. The sale of some 200,000 pounds of the Fall clip reported from Knoxville, Tex., the price paid being reported at 75 cents, although some operators believe that rather more money may have been received. Some New York hatters are interested in the effect that the mohair market there is without any material change, stocks being very limited and spinners willing to pay anything within reason to secure the supplies they need so much. However, some further arrivals were expected from the Cape at almost any moment, which would relieve the situation more or less.

At the Cape the season is just about to begin but some early buying is already reported with American operators rather keen to secure supplies and Bradford buyers by no means slow to bid against them. Some Winter firsts have been sold at 35 cents, first cut and Winter kids brought 44 cents while the second cut was sold in one case at least for 35 cents.

ALL POTATO MARKETS ARE WEAKER

Local Prices Are Slightly Lower—Declines at Shipping Points.

There was an easier tendency in the local potato market yesterday. The demand was slow and receipts of home-grown stock liberal. Oregon Burbanks were quoted at \$1.75 to \$2.00, Yukima Notted Gems at \$2.15 to \$2.25 and Idaho Burbanks mostly at \$2. Two cars of Washington potatoes arrived on the street. Minnesota and Wisconsin white stock ranged 10¢ to 15¢ lower at \$1.65 to \$1.75 per cwt. Wapapa, Wis., quoted 5¢ to 10¢ lower at \$1.65 to \$1.75 per cwt. head, Wis., also ranged lower at \$1.80 to \$1.85 per c. b. sacked. Colorado shipping points showed slightly weaker tone at \$1.40 to \$1.50 per cwt. Oregon Burbanks at Colorado shipping points ranged \$2.05 to \$2.25 for carlots in southwestern markets. Further declines are recorded in the Northwest. California shipping points were steady. Carlot movements again increasing.

Bank Clearings

Bank clearings of the Northwest cities yesterday were as follows: Balance, Portland, \$8,483,378; \$1,266,094; Seattle, \$10,824,963; \$1,185,896; Tacoma, \$1,195,020; \$142,125; Spokane, \$2,692,572; \$91,253.
