We were allowed to enter Finland, where we were treat-ed most kindly by the Finnish authori-ties."

I talked with other members of Ma Lockhart's party regating the general conditions in Russia. Everybody seems to think the situation is pretty nearly hopeless, agreeing that the position of the Bolsheviki is stronger than ever. The Red Terror, apparently under Lenine's pressure, is dying down in Moscow and is kept dark in Petrograd, where well-known people continue to disappear mysteriously. > Using a Tooth-brush as a Weapon of Protection Against Influenza

> If you treat your tooth-brush merely as a toilet article, you are casting it into the limbo of only halfimportant possessions. To look upon it as a means of keeping your mouth, as the gateway to your system, in as sanitary and cleanly condition as possible, is to use it as a measure of self-protection.

> During an epidemic of influenza this form of simple and effective self-protection is particularly recommended by all health officials.

> "It is easier and cheaper to prevent disease than to cure it," say army surgeons, leaders in medicine, and health boards. Some authorities claim that ninety per cent of all infections can be traced to the oral cavity.

> To keep the teeth, the mouth and the throat clean and sanitary is the office of Kolynos Dental Cream, Because it so well fulfills this office millions of tubes of Kolynos are used in America and other civilized countries.
