possibility that she may not. We must hold down the spirit of optimism in an early victory, and not suffer our con-fidence to cause a moment's relaxation in preparation for a longer strife. The German is absolutely unreliable. We must take no chances, but continue our preparations for an army of 5,000,000 men in France." Senator Chamberlain added that the winning of the war, though it would relax certain effort, would not im-mediately and automatically bring about the return of the troops from France. For many months to come, he predicted, American soldlers will be needed for duty in policing Germany and Austria and in aiding in the re-habilitation of France. **GERMANS AT MERCY** ALLIED NATIONS

How many times have you passed favorable mental or verbal judgment, on a man whom you didn't know, because he was well dressed.

Ninety-nine times out of a hundred you will find that man a success-because the favorable opinion of the world makes him a success- in fact that is real success.

While a diamond in the rough is a diamond, it is not performing its worldly function until it is properly dressed.

No man with high ideals and ambitions can afford to be poorly dressed, because we can within the means of anyone, dress you properly.

We have endeavored for years to make that so-we have succeeded. You can be well dressed by us, no matter what you are able to invest in clothes-and on that basis

The DALTON enables each pair of hands to work faster. It reduces the entire working keyboard of an adding-calculating machine to 10 keys. Putting figures into the machine is child's play. And get this point of time and laborsaving-the Dalton puts each figure into its proper column automatically.

And consider this-a simple, compact, scientifically arranged key-board, easily covered by one hand. At the start your newest office girl will take the figures from the ledger or sheets and then turn her eyes to the machine. Shortly, she gets away from this — operating entirely by touch—attaining a speed and accuracy unequalled on other machines.

## **Air-Borne Infection**

In the American influenza epidemic of 1916, bacteriologists found that only a small percentage of the cases they examined were infected with the influenza bacillus.

They found either the streptococcus, the pneumococcus, or the micrococcus-catarrhalis more prevalent than the influenza bacillus.

The most dangerous complications occur in influenza through the increased virulence of other microbes in the mouth, the throat and the air passages, to which the infection has been conveyed. Hence the extreme importance of keeping the chief gateways to infection in a sanitary condition at all times.

For this purpose Kolynos Dental Cream and Kolynos Liquid were created. When intelligently employed in daily use they establish a condition of sanitation in the mouth, the throat and the air passages unfavorable to acquiring or disseminating air-borne infection.

If not already a Kolynos user, begin today.
