Mothers!

An Appeal For Your Children

Look back at your childhood days. Remember the physic that mother insisted on-castor oil, salts or cathartics, How you hated them. How you fought them. How,

you dreaded their after-effects. That was all wrong, but then nobody knew better.

With our children it's different. The day of harsh physics is over. We don't force the bowels now; we coax them, We have no dreaded after-effects. And the dose is a candy tablet.

Mothers who cling to the old form of physic simply don't know what they do. The children's revolt is well-founded. Their tender bowels are harmed by them. The modern way is to give a gentle laxative more

frequently. To keep the bowels always active.

The best method is Cascarets.

Cascarets are candy tablets. Children love their pleasant taste.

They cost only 10 cents a box, with full directions for children's dosage at all ages. Babies too! Give Cascarets, then don't worry—they never disappoint."
