WAGE PROBLEM IS VITAL

Andrew Bonar Law Lauds Canadian
Spirit as Important Factor
in Great War.

LONDON, via Montreal, March 26.—The prosperity of the country depends upon its increased production and the efforts of the government will be directed to framing a policy on that basis, said Andrew Bonar Law, the Government leader in the house of commons in a statement in the commons today on the fiscal policy of the government.

Imperial preference, the government leader said, would be put into effect at the earliest possible moment, and the chancellor of the exchequer was considering how to give effect to it in the budget.

There would be no hesitation in announcing the general fiscal policy of the government whenever it was possible to decide how it would be carried out, Mr. Bonar Law declared.

High Wages Big Problem. An anti-dumping bill had been drafted, but had not yet been examined by the government, Mr. Bonar Law promised that the bill would arrive at a decision as soon as possible.

The government leader contended that the most vital interest in the country was high wages. He might be asked by labor, he said, how it would be possible to maintain high wages if cotton goods from Japan were put into the markets at lower price than British manufacturers must pay for cotton.

It was ridiculous to suppose, he said, that the old conditions would continue until for instance, he pointed out, a preference on sugar would enormously affect the empire's production of that commodity.

Canadian Spirit Praised. "It is not too much to say that we would not have gained the victory but for the help of the Canadian people," said Mr. Bonar Law. "Therefore, any measure increasing the productive power and man-power of the dominions is a good thing for Britain as well as the empire."

The government leader referred to the discussion in the Canadian Parliament upon Canada's share in the war indemnity and to the declaration of the acting prime minister of Canada that the Canadian people would not be treated as a conquered nation. The speaker remarked that such a spirit was worth more than any fiscal policy to the nation.

PUT CREAM IN NOSE AND STOP CATARRH

Tells How to Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache; no hawking, snuffing, mucous discharges or dryness; no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Salve. Apply little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly. It is just what every cold and catarrh needs. Don't stuff your nostrils with miserably—Adv.

BUTTER PRODUCTION LOW

Price Fixed by Russian Government Below Cost.

VLADIVOSTOK.—Butter production in Siberia has nearly stopped, according to an official statement issued by the government monopoly which fixed the price lower than cost. Most of the west Siberian butter producers turned to cheese-making in consequence. Peasants and cattle owners are finding it unprofitable to keep their herds and are selling them.

The monopoly on butter introduced by the Kerensky government and perpetuated by the bolshevik and other governments since, has resulted in complete demoralization of cattle breeding. After the monopoly became effective butter accumulated in the hands of the authorities until they were at a loss to know how to dispose of it. Great quantities were used as machine lubricant.

Today as a result of decreased production the price has increased in central Siberia to 6 1/2 rubles a pound.
