of eminent men all over the country joined in the plea by letter and by tele-gram. This is what Theodore Roose-velt said, as one of those letter-writers: "I heartily wish you success in your ef-fort to have Mount Tacoma taken as the official and proper name of the the official and proper name of the

mountain. It has always struck me as a piece of childishness to follow any other course."

Now, wouldn't you suppose that that was the way to go about changing the name of a mountain? But it didn't sucname of a mountain? But it didn't allo-ceed. After going through the form of giving a thorough hearing to the question, the board held another and secret session. What took place there it was almost impossible to learn. You say your suggestion for this (feeble and inglorious) compromise was "directed chiefly at Tacoma" (which "received it in cold slience") while "the possible magnanimity of (where it is eagerly accepted) "was wholly overlooked." I may say that Soloman, when the two women were before him both claiming motherhood of the one child, had the better psychology, as the saying is. For in proposing to give half the child to each he relied absolutely on the "possible magnanimity" of the woman who, through feal-ousy of the real mother, had made a false claim. She eagerly accepted the compromise, but the other woman got the haby. S. W. WALL. the baby.

As Mount Rocsevelt, you might have further added, it would be honoring one who, while in life, was a most outspoken and persistent champion of the Indian name of the mountain—Tacoma. That would be something.

But it is the concluding paragraph

in from the National Geographic society concerning the city reported to be occupied by Ukrainian soviet troops.

"Odessa had hundreds of sidewalk cafes, its municipal opera, its palaces of chance, and its glided halls of the balf-world. It had more than half a million population, yet is one of the newest cities in Europe. Moscow's history extends over a thousand years, that of Odessa only a little beyond a century.

"There is a unique analogy between Odessa and the capital city of the United States. Both were started at about the same time-during the last decade of the eighteenth century—and both were begun because of the far-seeing wisdom of the chief executives of the two nations.

-MARY AGNES KELLY. BLUE BUCKET IN TYGH VALLEY

Location of Lost Diggings, as Remembered by Pioneer John Herren. DAYTON, Wash., April 26 .- (To the DAYTON, Wash., April 26.—(To the Editor.)—Seeing frequent mention in The Oregonian of late of the old "Blue Bucket" mine. I want to add a little information upon the subject, information that came down to me of early Oregon history from my father, John Herren, who was an old Oregon ploneer, having crossed the plains by the old, slow-going ox team in 1845. I remember quite well hearing my father tell of the finding of those yelldw jumps, as his nephew was the man who member quite well hearing my father tell of the finding of those yellow lumps, as his neshew was the man who found them. He always contended it was somewhere in the Tygh valley. The emigrants were too tired and wornout to be interested, as winter was near and provisions nearly gone, and no one knew the value of the "shiny pieces," anywey.

This metal was found in some tracks made by the cattle in going to water—some muddy tracks. This was in the late fall of 1845. How this came to be called "Blue Bucket" I can't tell, as my

called "Blue Bucket" I can't tell, as my father never called it that.

Very few of that old company are left. I do not know any. My father and mother and all my brothers and sleters have long since passed over, so sisters have long since passed over, so I, sione of a big family, am left. Perhaps some one living who knew about this finding, and were in that old lost train, as that was the train lost on the "Meek's Cutoff," and nearly starved to see a complete account of that famous "Meek's Cutoff" tragedy, but have never found it in any history, in full. My native state is Oregon, and I would like to see her history made correct.
