NEWPORT, Or., May 15.—(Special.)—
Native oysters of Yaquina bay, usually sold as Olympia oysters elsewhere, have increased greatly in the past two years, according to George Lewis, leader of the local oystermen. Mr. Lewis said that when work was severed to exercise. that when work was scarce for several years many persons gathered cysters to eat and sell, but ceased gathering them when work became plentiful. Eastern oysters have been transplanted here, but have never propagated satisfactorily. Some Japanese oysters also were introduced some years ago, but they also disappeared.

The large blue clams of Yaquina bay apparently are inexhaustible. Coharts, butter clams and recording also

butter clams and razor clams also are found in limited quantities along the shore. Rock oysters, which have brought considerable fame to Newport, are as plentiful as ever.

This is natural. A man's appearance reveals either his character or his financial condition. In either case the story told by shabby clothes is not complimentary.

CAN YOU DIGEST YOUR FOOD?

If you can't digest food you get no nutriment from it. Shredded Wheat is the whole wheat made digestible by steam-cooking, shredding and baking. Many thrive on it who cannot digest any thing else. A breakfast of Shredded Wheat causes a feeling of comfortable satisfaction, supplying all the nutriment needed for a half day's work.
