**One Cause of a Bad Complexion—the Remedy**

"Look at a section of skin under the microscope and you will readily understand why cosmetics generally injure the complexion," says a well known physician. "The skin, smooth as it looks to the naked eye, under the glass exhibits a lacework of tiny holes, mouths of myriads of little glands. To keep the skin healthy, these holes must be unobstructed, that the secretion and natural oil can have free outlet. Should the glands be blocked up with irritating, gritty particles, a common result of using powders and creams, nature retaliates by causing sallowness, roughness, blotches or pimples.

"As a substitute for all cosmetics I recommend ordinary macaroni wash. It not only does what the various face preparations are supposed to accomplish but its peculiar absorbent action frees the pores from the daily accumulation of impurities, also absorbing the devitalized particles of surface skin. This produces a nature healthy, youthful complexion. One ounce of this wash, to be had in any drug store, usually suffices to rejuvenate the poorest complexion. It is put on nightly like cold cream and washed off mornings."—ADV.
