Don't Poison Baby.

Forty years ago almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and A FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher.

Children Cry For

Fletcher's CASTORIA

Mother and Doctor. Baby's not well. Looks well but cries, and now what's the matter? Pins? No. Tight band? No. Seem to enjoy its breakfast this morning? Yes. What did the meal consist of? A cup of hot milk and I guess I gave her some of the rolls and bacon I had. Don't guess. If that was her breakfast send out for a bottle of Fletcher's Castoria, and after you give her a dose read carefully what a baby of her age should have for breakfast—you'll find it in the booklet around the bottle.

Too many young mothers are like this mother. Caution. That's the word that should be hung in every home. Caution, Mothers, must be burned, burned deep in your mind if our little-ones are to remain with us.

At the first irregularity: at the first flush of fever give Fletcher's Castoria, then call in your physician—he will commend you. You will have done much to aid him.
