URGE WORLD STRIKE

Italy Used as Headquarters for Vast Propaganda.

Vienna Press Charges Huge Sums Are Set Aside for Carrying on Campaign of Destruction.

(Copyright by the New York World, Pub-lished by arrangement.) LONDON, July 17 .- (Special cable.)-A dispatch from Milan to the Daily Telegraph says a general international strike declared for July 20 and 21 is

being engineered in Italy by strange subterranean forces against the will of the vast majority of the working classes, who are becoming weary of strikes and anarchy. The intention of the leaders is simply to create such difficulties and foment such discontent as eventually will bring about political revolt and upheaval.

The hand of Prussian and Hungarian propaganda in this anti-national work is apparent. It has been reported from Vienna that both Hungary and Prussiah had established in that city the vast machinery of an international corruption to which they supplied enormous funds to pay anarchists in other countries.

WASHINGTON, July 17.—Answering congressional investigation of the coal situation, government officials and coal operators told the house rules committee to day that a fuel shortage was impending.

"Coal men fear the situation may get away from them and that prices may rise \$5 or \$6 a ton," declared C. E. Lesher of the geological survey. Their devertising of the situation is in hope that this may be averted, for they know that the condition would reflect on them."

Anthracite production since January 1 was 10,600,000 tons less than last grant and the condition would reflect on them.

Press Names Emissarles The Vienna papers have published a list of the names of these emissaries and the sums received by each, which are astonishing. It is not likely these sums were wasted merely with the in-tention of corrupting small Austrian states. The object certainly was some-thing greater and there is ground for suspicion that much of this money found its way to Italy and some also to France

Commenting on the fall in American exchange in London, the Morning Post Realities Must Be Faced. "On the whole, we cannot help think-

ing that the right course was pursued in removing control some months back. For it is only by clearer recognition of the effects of an adverse American exchange, namely, dearer food and dearer change, namely, dearer food and dearer commodities generally—and the cause, namely, our overwhelming indebtedness to the states—that the country will wake up to the urgency for increased economy in all that pertains to our purchases of imports and for a quickening of our industrial activities.
