

REDS REFRAP TO BEWILDER PEOPLE Amazing Theories Bared in Emissaries' Guidebook.

WORLD DICTATOR IS PLAN

Destruction of Religion and All Initiative Power in Minds of People Is Stepping-Stone.

BY CARL W. ACKERMAN. (Copyright by the Public Ledger Company. Published by Arrangement.) NEW YORK, Oct. 27.—A prominent American diplomat has placed at my disposal a Russian document which bears every evidence of being the guidebook of the world revolutionists.

It is a booklet of 24 protocols, written by one of the leaders of the bolshevik movement for the guidance of the secret council of the soviet, and was brought to the United States recently by an American intelligence officer who has been in Moscow and Petrograd.

These protocols, excerpts of which here are published for the first time, show the diabolical methods of the world's master aiming at the destruction of all government and the substitution of proletarian dictatorship under the leadership of a man like Lenin. In the third paragraph of protocol 1 this statement is made:

Violence Is Advocated. "It must be noted that the people with bad instincts are more numerous than those with good ones; so the best result in governing them is obtained by intimidation and violence and not academic arguments.

"Every man aims for power, everyone wants to be dictator if possible, and at the same time he would not sacrifice the good of others for the attainment of his own ends. Right is might.

"Political freedom is an idea and not a fact," the article reads. "It is necessary to know how to apply this idea when there is need of intellectual bait to gain the support of the people for a party, if such is undertaken to break another party already in power.

Theory Is Expounded. "This aim is made easier if the opponent himself is carried away by the principle of freedom or so-called liberalism, and for the sake of the idea will give up some of his power. It is here that the success of our theory becomes apparent.

"The weaknesses of authority are immediately grasped, according to the laws of existence, by a new hand because the blind force of the people cannot be tolerated to remain without a leader for even a day, and the new authority simply steps into the position of the old, already weakened by liberalism."

In speaking of the methods of introducing anarchy, the author writes: "The shaman confesses there cannot be a healthy, logical hope of guiding the masses successfully by thought, arguments or by statements when there is a possibility of contradiction.

Party Division Feared. "Guided by exceptionally shallow passions, beliefs, prejudices and sentimental theories, the people in the crowd are inclined to party division.

"At such a time as this, after governments have been weakened by liberalism," the article reads, "the word 'right' is used to create anarchy and 'our right lies in force.' The word 'right' is used to create anarchy and there are no proofs of it. The word means nothing more than give me that which I want, that I may have proof of my superior strength over you. In a government with poorly organized authority, where the laws and rules are not strictly followed, the right of strongest and the destruction of all existing regulations and statutes, or the right to change and becoming the ruler of those who give us the right to use our power by intimidating it voluntarily and liberally.

"Taking up the unrest which today is world-wide, the document states that: 'With the present instability of all authority our power will be more unassailable than ever, because it will be invisible until it is so well rooted that no cunning can undermine it.

In view of the radical agitation in the United States and the success with which William Z. Foster and other extremists have carried over into the American Federation of Labor and the astounding number of unauthorized strikes in the country, the protocol of Russia might be also the protocol of the bolsheviks here.

"Our passport is power and hypocrisy, for only power can conquer talents necessary to govern people."

No Method Too Evil to Use. This excerpt from protocol 2: "Violence must be the principle; hypocrisy and cunning the rule of the government which does not wish to lay down its crown; the fear of the agents of any new power. Evil is the sole means of reaching the goal of good. For this reason we must not hesitate at bribery, cheating and treason when these can enable us to reach our end. In politics it is necessary to make the property of others without hesitation if by that we obtain submission and authority.

"Our government, following the line of peaceful conquest, has the right to substitute for the horrors of war the least noticeable and more efficient executions.

"A just but inexorable strictness is the greatest factor of the government. We must follow a programme of violence and hypocrisy, not only for the sake of profits, but also for duty and for the sake of victory."

The cold-blooded manner in which

POWER PLANTS ADVERTISED PORTLAND-VANCOUVER INTER-STATE IDEA ADVANCED.

A. L. Haley of Port of Vancouver Tells of Possibilities for Using Mountain Streams.

Establishment of an interstate hydro-electric system by Portland and Vancouver as a means of building up these cities and adjoining communities is proposed by A. L. Haley, an engineer retained by the Port of Vancouver, after a careful study of power development in the middle western and eastern states.

Mr. Haley was formerly connected with the United States shipping board and the emergency sea corporation. His study in the east covered a period of six weeks. While made primarily for his employers, it was, in a broader sense, for the benefit of this entire district he said yesterday, on his arrival in the city.

"Within a radius of 100 miles from Portland, Mr. Haley said, 600,000 horse-power of electric energy can be developed. Bringing back its color, vigor and vitality. Get a 36-cent bottle of delightful 'Danderine' at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry—Adv.

Oyster Bay, where the 48th star will be sewed on before it is raised over the colonel's grave. At night there will be a dinner of the Rocky Mountain club, at which the guests will include Herbert Hoover, John Hays Hammond, Alton B. Parker and Ellihu Root.

At the same time members of Roosevelt's Harvard class of 1880 will gather at the Harvard club "to honor the memory of the colonel who was one of the most illustrious graduates."

Church to Be Destroyed. Protocol 4 maintains that "liberty comes as you do your own work, programme of governments without loss to the well-being of the people. It is the belief in God, the brotherhood of man, exclusive of the thought of equality, contradicted by the laws of existence, which establish servitude. With such a belief the people would be governed by the guardians of the parish and would drive quietly and obediently under the guidance of their spiritual leaders, accepting God's ways of life on earth.

"It is for this reason that we must undermine faith, extract from the minds of the people the very principles of God and replace these concepts by arithmetical calculations and material demands."

"It fits in well with the bolshevik programme in Russia of destroying the influence of the church and of substituting in its place a party given forcefully taken from one and given to another. In relating the methods used to destroy faith in the church, this protocol states:

"At the time when people considered that the rulers expressed the will of God, they subjected them to their personal rights, they began to regard the rulers as plain human beings. The announcement of God from the heads of the church in the regard of the people. Then we destroyed them of this belief in God, whereupon authority was thrown into the street, where it became public property and was grasped by us."

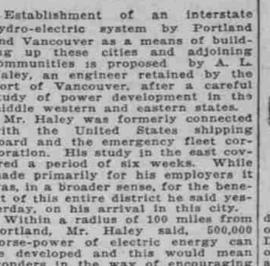

Plan to Perplex Public. In recent years the soapbox orator has been the chief spokesman of radicalism, and the doctrines which he has expounded have always seemed absurd in the minds of intelligent human beings. But according to the methods of the bolsheviks, "it is necessary to perplex public opinion in order to conquer it. We will appropriate to ourselves all physical and moral powers of all opinions, and provide them with orators who will talk so much that they will be unable to understand each other."

"This will help us to create disagreement among all parties, to divide the persons liberally. This results in a heavy moral blows, disappointments and failures. We must direct the people by this to offer us international power, which, by its position, will be enabled to absorb all the governmental forces of the world and then form a super-government. Its arms will stretch on all sides like a spider and will form no colonial organization as cannot be subjugate all the nations."

Discussion Is Entering Wedge. "The ideal of the bolsheviks, according to protocol 7 is to be considered 'the aviators of mankind.' This article, which is the briefest of the 24, and which is the result of a shall quote in this telegram, reads as follows:

"The concentration of armament and the growth of the political state are essential to the realization of the above-mentioned plans. It is essential in our governments that there should be only a mass of proletarians, a few millionaires devoted to us, politicians and soldiers."

LET "DANDERINE" BEAUTIFY HAIR Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Bandits Release Consul. WILLIAM O. JENKINS WINS FREEDOM AT PUEBLA.

News Concerning Official Held for \$150,000 Ransom Is Received by His Relatives.

HANFORD, Cal., Oct. 27.—William O. Jenkins, American consul agent at Puebla, Mexico, who was kidnaped by Mexicans last Sunday and held for \$150,000 ransom, was released by the bandits yesterday according to information received last night by relatives here.

The telegram was from Jenkins' sister, who was visiting at the ranch from which he was kidnaped. It read: "Oscar was rescued this afternoon. Advise relatives. ANN. Von Waldstatten, chief of staff of the division here from Fresno, the family did not learn the date it bore.

The telegram was received by the consul agent father, John W. Jenkins, from his daughter, Miss Annie Jenkins, shortly before midnight. Mr. Jenkins said no ransom money had been put up for the release of his son, but that he knew, and that he had no idea how the rescue was effected.

"All I know is what the telegram stated," he said.

Jenkins was kidnaped one week ago tonight, but news of his detention did not reach his family here until last Wednesday, when a telegram was received from his sister, Mrs. Jenkins, who said she had come from her father's home in the vicinity of his ranch, according to his letters to his relatives here.

Mr. Jenkins' father, in a statement given out here last Wednesday, said the ransom demanded by the bandits would be paid. However, he appealed to national and California officials for assistance in securing his son's release. This is the second time the American consul agent has been held for ransom, his relatives having been forced to pay \$25,000 to a band of bandits about five years ago under somewhat similar circumstances. He is said to be worth several million dollars.

Whether his relatives in Puebla, his wife, two daughters and one sister, had paid the sum demanded on this occasion, the telegram today did not state. Another daughter is attending school in Los Angeles.

Mr. Jenkins is 41 years old and has been in Mexico 18 years. He is a prominent merchant and manufacturer of Puebla. Besides his consular post at that point he has been held for ransom in a capacity not exactly known here.

This false report resulted in the capture by the Italians of several hundred thousand Austrian prisoners.

General Arz refused to testify on the ground that he was a Hungarian subject. The court overruled his objection.

Re-decorating Rooms with Light

WE moved into our new home this fall and I've had a wonderful time fixing it up. It was just like being a bride again. But I couldn't seem to make the living room right, although most of the things in it were new.

I would spend half the day getting the room to look comfortable and inviting. Then, when my husband came home, we would light up and it would look like a rummage sale.

This went on for a week, until at last I went downtown and told my troubles to Mr. Bibber, the merchant from whom I had brought our furniture.

"You say it looks all right in the day time and all wrong at night," he said. "What kind of lighting fixtures have you?"

"Just one," I said, "a very striking chandelier."

"Probably too striking," he said. "We used to have just fixtures here in the store. We had handsome fixtures—graceful bowls hung from ornamental chains. And every one of them seemed to hit you right in the eye. I used to say that lots of customers didn't buy our goods because they were admiring our fixtures. But the real truth was that the light was glary and gloomy at the same time—glare on the ceiling and on the polished floor and in the corners."

"So we changed and put in these," he said. "And he looked at my chandelier and saw here and there handsome, softly lighted silk shades in various colors. I stepped here, near the nearest one and found myself looking directly up, without blinking, at a glowing disc of glass.

"This," said Mr. Bibber, "is a combination of direct and indirect light. The curved metal deflector throws most of the rays upward and floods the whole room with a mellow, diffused light, while through this glass disc other rays go directly downward, giving an added intensity beneath but filtered so that there is no glare. It can be used with a silk, cotton or parchment shade in any color. Without the shade it makes a perfect light for the kitchen or bathroom. It is used in many offices and drafting rooms where a brilliant but well diffused light is needed, and it affords the first practical means of using in the home the Mazda C—the most powerful and efficient lamp ever invented."

I went straight from the store to the electrician, and when I found that Duplexalite, including the beautiful shades, cost no more than ordinary lighting fixtures and that they could be put up in a few minutes, I ordered one on the spot. The electrician came right up and in less than half an hour the old chandelier was gone and Duplexalite was in its place.

When my husband came home he went, as usual, to the living room and snapped on the switch. He took one look at the room and exclaimed, "Clever little woman. You've got it at last—how did you do it?"

I pointed to the light. "Why," he said, "I never noticed that."

"You're not supposed to," I said, "not until you've taken in the rest of the room. A light isn't there to be looked at itself. It's there to make the other things in the room look more beautiful."

"Well," he said, "it certainly does make everything in the room look more beautiful—including you."

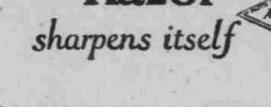

Which was only his foolish way of complimenting me when he thinks I have done well.

What kind of shave did you get this morning?

YOUR shave this morning—was it quick and smooth, or slow and irritating? When your razor blade is fresh, you get a smooth, comfortable shave. But very soon your beard begins to dull the edge—the blade begins to "pull" and scrape. It grows progressively worse—at last you throw the blade away.

Why endure this annoyance? With the AutoStrop Razor you can renew the fine, smooth edge of your blade for every shave. A remarkable stropping device, simple and efficient, is built into the frame of the AutoStrop J.
